

# TECHNICAL GUIDE SHEET

BIOPREVENTICS RESEARCH® was founded out of a search for high quality nutraceuticals. We promise to deliver the highest purity and most efficacious products available. At the same time we promise to control costs in delivering competitively priced products without fillers or excipients. We realize that in purchasing our products you entrust us to be your agent in delivering well researched, high quality products.

## **Betammune™**

**Ingredients Per Capsule:** Beta-1,3 Glucan.....500mg.

**Other Ingredients:** Gelatin.

Beta Glucan is a purified particulate polyglucose compound extracted from the cell walls of baker's yeast (*Saccharomyces Cerevisiae*). Beta Glucan has been documented to provide great immune potentiating benefits.\* There is no known toxicity.

### **Quality Documentation**

We certify that the percentage of Beta Glucan in Betammune™ is at least 89% as verified by an independent third party Certificate of Analysis.

## **Veramannan™**

**Ingredients Per Capsule:** Beta-1,4-Acetylated Glycomannan.....500mg.

**Other Ingredients:** Gelatin.

Acetylated Glycomannan is a major carbohydrate fraction derived from the central gel of the leaf of *Aloe Barbadensis* Miller. It is a 200:1 concentrate of the long chain polysaccharides in the range of 500,000-2,000,000 + Daltons in size. It contains a broad spectrum of mannan-polysaccharides that may enhance many bodily functions as well as provide great support of the immune system.\* There is no known toxicity.

### **Quality Documentation**

We certify that the Acetylated Glycomannan found in Veramannan™ retains 87-100% of the polysaccharide chains ranging from 500,000 to >2,000,000 as verified by third party MALLS (Multi Angle Light Lazer Scattering System) and/or SEC analysis.

## **Mannanloe™**

**Ingredients Per Capsule:** Beta-1,4-Acetylated Glycomannan.....500mg.

**Other Ingredients:** Gelatin.

This Acetylated Glycomannan is a major carbohydrate fraction derived from the inner fillet of the leaf of *Aloe Barbadensis* Miller. It is a 200:1 freeze-dried concentrate of the short chain polysaccharides in the range of 12,500-500,000 Daltons in size. It contains a spectrum of mannan-polysaccharides that may enhance many bodily functions.\* There is no known toxicity.

### **Quality Documentation**

We certify that the Acetylated Glycomannan found in Mannanloe™ retains 80-100% of the polysaccharide chains ranging from 12,500 to 500,000 as verified by third party MALLS (Multi Angle Light Lazer Scattering System) and/or SEC analysis.
