VERAMANNAN™

a potent
immune
modulator
for your
patients cell
mediated
immune
system

VERAMANNAN™

To support the cell mediated immune system:

Immune regulation
Antibody stimulation
Macrophage activation
Histamine Reduction
Allergic Response Reduction
And other benefits

VERAMANNAN™

VERAMANNAN™ is Beta-1,4-Acetylated Glycomannan (AG) which is derived from the gel of the leaf of the Aloe Barbadensis Miller Plant. The polysaccharide of Aloe is a long chain sugar molecule that is comprised of glucose and mannose sugar molecules connected together. There is a large range in sizes of polysaccharide molecules. The size and makeup of the molecule determines its effectiveness for various applications. **VERAMANNAN™ is composed predominantly of large polysaccharide long chain sugar molecules which measure in size from 500,000 - 2,000,000+ Daltons.** Its primary healing action is that of an immune modulator. **Molecules in this size range have proven to have a powerful healing effect on conditions involving immune system dysfunction.**

Numerous scientific studies have been performed by researchers who have substantiated the actions and effects of Beta-1,4-acetylated glycomannan.

It has been noted in these studies evidence that:

- ◆ Bolstering of the immune system has been demonstrated
- ◆ Phagocytosis is stimulated
- ◆ Antibody formation is stimulated
- ◆ Depressed phagocytic function of white blood cells is increased in bronchial asthma patients
- ◆ The polysaccharide exhibits antiviral activity and enhances cell function in some viral infections
- ◆ The polysaccharides bypass the digestive system intact and are absorbed by endocytosis (taken up into the cells of the intestinal lining intact and extruded into the circulatory system). It is here that the immune supporting functions are fulfilled.

Many more beneficial applications of Beta-1,4-acetylated glycomannan are demonstrated within the scientific literature.

WHO MAY BENEFIT FROM USING VERAMANNAN™?

- ◆ Those with acute and chronic health conditions
- ◆ Those undergoing physical stress
- ◆ Those under physical and/or emotional stress
- ◆ Those in advanced age
- ◆ Those with chronic fatigue
- ◆ Those with a challenged immune systems
- ◆ Those desiring prevention and maintenance

Supplement Facts

Serving Size: One Capsule

One Capsule Contains:

Beta-1,4-acetylated glycomannan.....500mg.*

* Daily Value not established

Other ingredients: Gelatin.
