

IMMUNE PROTOCOL

VITAMIN A supports normal white blood cell production and activity*

MONOLAURIN has been found to incorporate itself into the cell membrane of gram positive bacteria, blocking replication and making it an easier enemy for your immune system to take care of. (Tokarsky & Marshall, 2008).

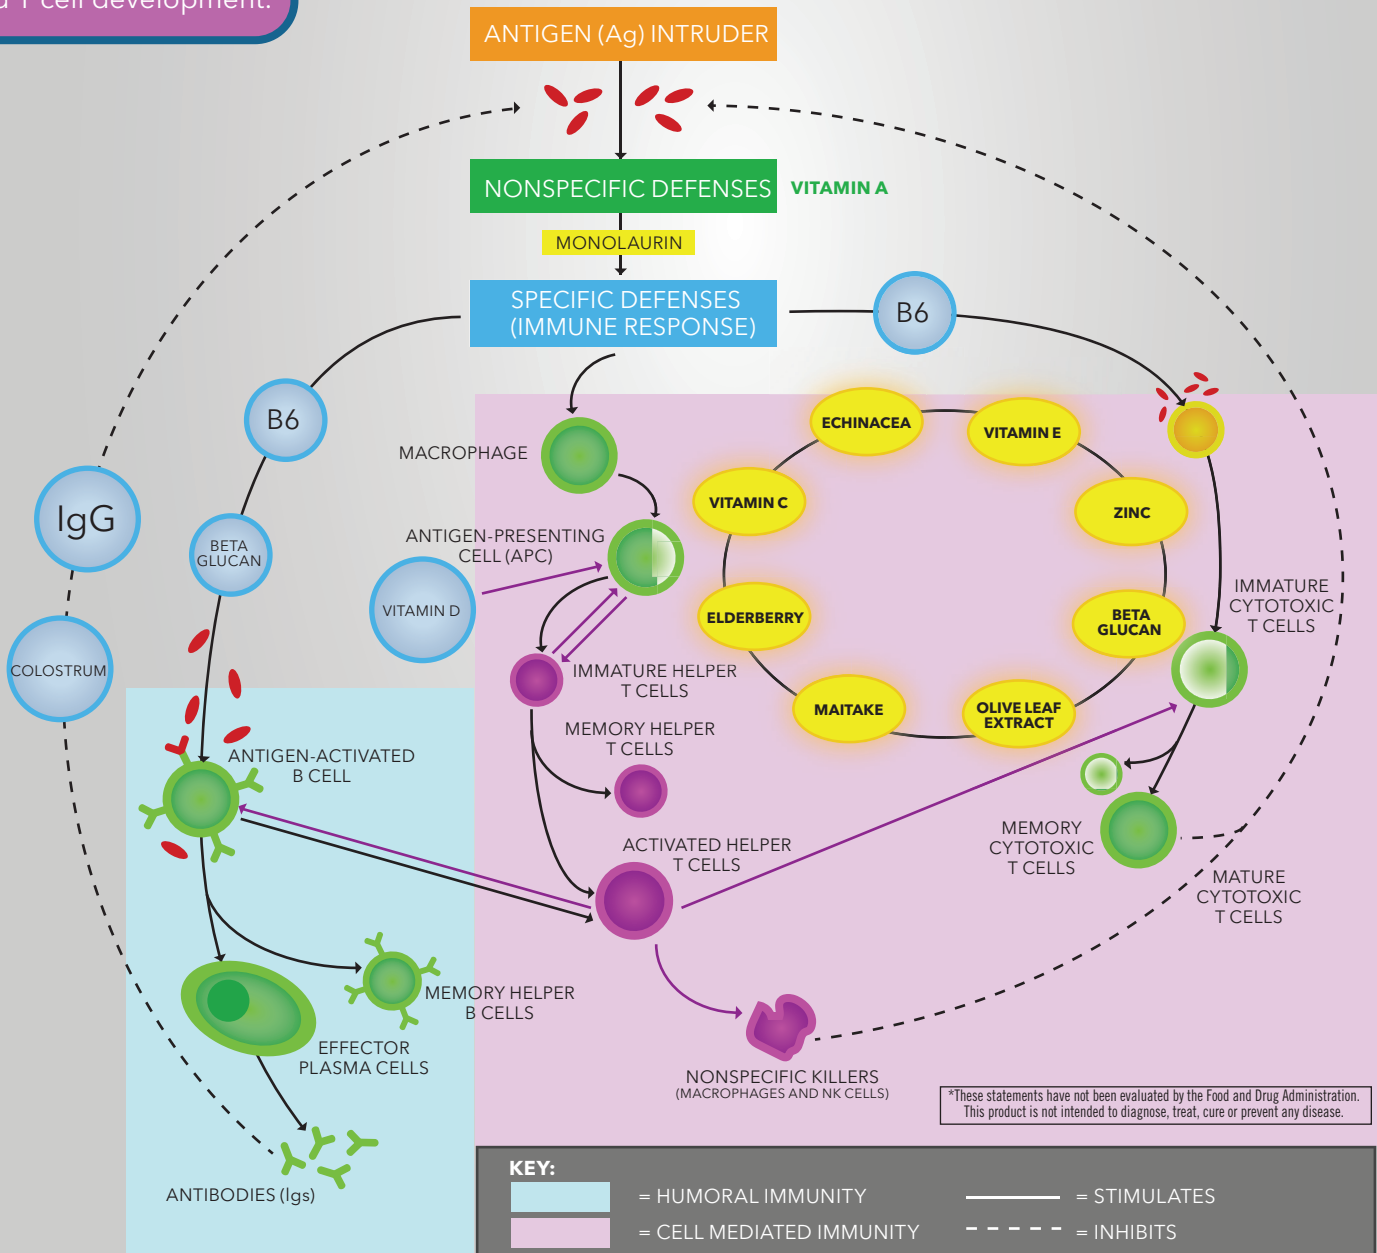

Located on many immune system cells, **VITAMIN D** receptors allow D to act as a modulating agent, supporting overall system health.*

VITAMIN B6 supports B and T cell development.*

IgG, the major immunoglobulin in blood, is a key factor in humoral response. Immunoglobulins, also known as antibodies, specifically recognize and bind to particular antigens to support destruction.

COLOSTRUM contains transfer factors that can teach the system to recognize antigens, essentially transferring knowledge and memory, and therefore acting as part of the humoral system.

VITAMIN C has been shown to stimulate both the production and function of leukocytes (white blood cells), especially neutrophils, lymphocytes, and phagocytes. Specific measures of functions stimulated by vitamin C include cellular motility, chemotaxis, and phagocytosis.

IMMUNE PROTOCOL: ONGOING

Ongoing: Primary protocol is designed for everyone. The addition of the Secondary products is designed for people whose health history indicated a need for a higher degree of immune support.

PRIMARY SUPPORT

Metabolic Multi: 3 capsules twice daily
Daily Best™ Ultra: 1 capsule daily
Immuno Benefits™: 2 caps daily
Mega Probiotic-ND™: 3 capsules daily

SECONDARY SUPPORT

Liposomal C: 1-2 tsp daily
Arabinogalactan: 1 scoop daily
Gluconic®-DMG 500: 1-2 tablets daily

IMMUNE PROTOCOL: ACUTE

Acute: This protocol should be implemented for the duration of the acute immune stress plus 1 week to ensure that the immune system has the support necessary to regain its full integrity.

PRIMARY SUPPORT

Daily Best™ Ultra: 1 capsule daily
Immuno-DMG™ Chewable:
 Adults (Age 18 & above): 1 tablet, 2-4 times daily
 Teens (Ages 12-17): 1 tablet, twice daily
 Children (Ages 4-11): 1 tablet daily
Maitake DMG™ Liquid: 1 ml 6 times daily for 30 days then transition to 1mL 3 times daily for 30 days and move to ongoing support
Immuno Benefits™: 2 caps daily

SECONDARY SUPPORT

If after three days additional support is needed:
Olivir™ 15
Colostrum
Olivir™ 15: 2-4 capsules daily
Colostrum: 2-3 capsules daily
