

**SIMPLY FORMULATED
TO DELIVER MORE.**

IMMUNO BENEFITS™

A dietary supplement to support immune system health.*

Immuno Benefits™ is aimed at providing the most potent immune supportive nutrients both on a daily basis as well as during acute immune stress.* Because these ingredients support healthy immune function and are not specified for upregulation support, those with hyperactive immune responses may also benefit from this formula.*

The researched ingredients in **Immuno Benefits™** include the yeast beta 1,3/ 1,6 glucan derived from the cell wall of a proprietary strain. Wellmune® is a natural way to support immune system health. It has been studied for its effects on respiratory tract infections, moods during stressed states, and immune response after exercise. Beta-glucan has also been found to play a modulating role in Th1/Th2 balance (Kirmaz, Bayrak, Yilmaz, & Yuksel, 2005).

Another ingredient in **Immuno Benefits™**, Monolaurin, exhibits antiviral and antibacterial activity (Lieberman, Enig, & Preuss, 2006). Also known as glycerol monolaurate, glycerol laurate or 1-Lauroyl-glycerol, Monolaurin's chemical formula is C15H30O4.

Researchers have found that Monolaurin can provide broad immune support (Lieberman, Enig, & Preuss, 2006), can combat the toxicity of many gram positive bacteria (Peterson & Schlievert, 2006), and kill *Candida albicans* (Bergsson, Arnfinnsson, Steingrimsson, & Thormar, 2001). Monolaurin has been found to incorporate itself into the cell membrane of gram-positive bacteria, blocking replication and making it an easier enemy for your immune system to take care of (Tokarsky & Marshall, 2008).

Finally, **Immuno Benefits™** contains colostrum. Colostrum supports immune system health through its content of transfer factors.* These molecules can be transferred from a blood donor to a recipient, and can teach the system to recognize antigens, essentially transferring knowledge and memory, and therefore acting as part of the humoral system. When female mammals produce colostrum just after giving birth, that substance supports a newborn's immune system development, getting the process started. Bovine colostrum contains transfer factors like hydrogen peroxide and IgG, which our healthy cells produce to fend off invaders.

To create a protocol for immune health support, consider trying these other DaVinci® products with **Immuno Benefits™**•:

Metabolic Multi™ or Daily Best™ Ultra
Mega Probiotic-ND™

Or

Maitake DMG
Liposomal C

Immuno Benefits™ could also be used in a protocol for thyroid health support, along with Tri-Mag 300 and a detox support supplement.*

SUPPLEMENT FACTS

Serving Size 2 Capsules

Servings Per Container 30

| | |
|--------------------------------|--------|
| Colostrum | 500 mg |
| yielding Immunoglobulins (IgG) | 200 mg |
| Monolaurin | 300 mg |
| Bakers yeast beta glucan | 250 mg |

Other ingredients: hypromellose (capsule), microcrystalline cellulose, vegetarian leucine.

Contains: Milk.

Warning: If pregnant or nursing, consult your healthcare practitioner before taking this product.

Suggested Use: As a dietary supplement, take 2 capsules daily, or as directed by your healthcare practitioner.

wellmune®

Sold Exclusively Through Healthcare Practitioners.
