The Healing Revolution is here.™
**Mission:**

To lead the way in professional, cutting-edge products and procedures.

To create safe, all-natural medicines with no negative side effects.

To develop new diagnostic procedures that empower the physician to better resolve the chronic recurring and resistant problems plaguing our society.

To provide the physician with effective educational tools for attaining optimal health.

To achieve and maintain your utmost respect in product quality and services.

To offer more effective and affordable health care solutions.

**Premise:**

That all people are designed to be healthy, and, with the proper tools, can overcome disease.

Our focus is to equip people with the tools they need to overcome disease.

**Values:**

To love and care for people who are sick and suffering.

To research and develop the most effective health care solutions.

To serve with honesty, integrity, and purity of intent.

To make the necessary sacrifices that most positively impact our world.

What Is Homeopathy?

Homeopathy is a scientific system of health care that activates the body’s own healing processes to cure disease naturally, gently, and promptly. Homeopathy is a natural pharmaceutical science that uses very small or infinitesimal doses of substances from the plant, mineral, and animal kingdoms to activate the body’s healing response.

The word *homeopathy* is derived from the Greek “homoios,” meaning similar, and “pathos,” meaning suffering.

German physician and chemist Dr. Samuel Hahnemann founded the science of homeopathy in the late 1700s. While performing research on the toxicological effects of the medicines of his time, Dr. Hahnemann discovered that a specific dilution of a substance would remove the symptoms the same substance was capable of evoking. Through numerous experiments, he advanced the theory that “likes are cured by likes,” and established what has become a verified law of pharmacology, the Law of Similars.

For example, if one drinks too much coffee, the mind races and prevents sleep, the nervous system becomes hypersensitive, and trembling may result. A specifically prepared dilution of coffee will gently and promptly reverse these types of symptoms.

Another example is seen in the symptoms caused by being exposed to sliced onions. The eyes may burn and water profusely, and the nose may run and sneezing may occur. These symptoms produced by sliced onions are very similar to those of hay fever. *Allium cepa*, Latin for red onion, is a powerful remedy when diluted and prepared using homeopathic principles.

You will also find application of the Law of Similars in genetics, physics, chemistry, and immunology. In physics, opposite poles of a magnet attract, while similar poles repel. By placing similar poles next to each other, a weakened magnet will be regenerated or restored through the Law of Similars.

A basic principle of solvent chemistry states that a substance will be a solvent to another substance when it has a similar type of molecular bond. It has to be either similarly polar or similarly apolar, for a substance to dissolve another substance. Immunology, of course, crudely applies the Law of Similars to activate antibody responses with small doses of allergenic substances.
“Homeopathy cures a larger percentage of cases than any other method of treatment, and is beyond all doubt safer, more economical, and the most complete medical science.” ~Mahatma Gandhi

**Homeopathic Principles**

Homeopathic remedies focus on the *whole* person and the body’s own natural defense systems. Homeopathy recognizes the body’s built-in capability to heal itself and maintain a healthy, vibrant state of well-being. Homeopathy teaches how disease symptoms represent the body’s own intelligence, communicating via the sensory nervous system that it needs help. We can reinforce the body’s efforts by administering very small or infinitesimal doses of a substance, which if taken in large quantities over a period of time, would produce the same symptoms as the disease.

**The Law of Potentization** - refers to the specific dilution procedure of homeopathic formulas. These specific dilution ratios with succussions or shaking are continued to various levels, called *potencies*. The lesser dilutions are known as low potencies, and the greater dilutions are known as high potencies. Higher potencies act deeper into the nervous system, therefore creating a more potent effect upon the body’s natural healing responses.

**Hering’s Law of Cure** – The Father of American homeopathy, Constantine Hering, M.D., was one of the first to observe specific ways that the healing process develops. He made three observations of the true healing process, which have been called “Hering’s Law of Cure.” His three observations are as follows:

1) **The human body seeks to externalize disease.** One of the miraculous functions of the body is to move disease from more serious, internal levels, to more superficial, external levels. For example, during the homeopathic treatment process, a patient treated for allergies or asthma may develop a skin rash during the curative process. Someone with a deeper mental or emotional condition may commonly notice an improvement in their mental or emotional condition when physical symptoms occur. Most conventional medical treatments control or suppress the physical symptoms, thus possibly reactivating the patient’s original condition. The human body is closely interconnected mentally, emotionally, and physically, and must be managed in this way.

2) **Healing progresses from the top of the body to the bottom.** A person with a skin rash or arthritis over their entire body may notice relief in the upper body before the lower body. Understanding this law of healing helps the physician differentiate a true cure from temporary relief, suppression, or a placebo response.

3) **Healing proceeds in reverse chronological order of the appearance of symptoms.** As healing progresses, a patient may sometimes re-experience symptoms that he or she previously suffered. This may occur when symptoms were conventionally suppressed and not treated with natural therapies.

In the past, many had difficulty understanding these laws; however, the power of minute quantities is all too well established in this nuclear age. Note: See the references in our *Research in Homeopathy* chapter for documentation of this and other phenomenon.
What Types of Diseases Does Homeopathy Address?

Homeopathy does not treat diseases: it activates the body’s own healing processes at the physical, mental, and emotional levels. The range of problems homeopathy can be effectively used for is extensive and includes, first aid, acute illnesses, and all types of chronic conditions.

Research in Homeopathy

Whenever critics say that homeopathy has not been thoroughly researched, we can confidently inform them that they are not familiar with the scientific literature. The following summarizes a number of double-blind studies, including laboratory and clinical research. Homeopathy also has a most impressive accumulation of statistics acquired during the past 220 years.

In an age when allopathic medicines have a rapid turnover rate due to harmful side effects or ineffectiveness, homeopathy has withstood the test of time. As basic truths will always exist, so have the remedies of homeopathy. It should be known that in 1975, the U.S. Congress Office of Technology Assessment estimated that only 10-20% of all conventional medical practices have been shown to be efficacious in controlled trials.

Early Research

To the surprise of most, the first double-blind crossover study ever performed was done in 1906 by homeopaths. This impressive study was done concurrently in eleven different cities on 51 subjects. This particular experiment consisted of 665 pages, which contained research provings of Belladonna.

In addition, at the turn of the century, a book called The Logic of Figures or Comparative Results of Homeopathic and Other Treatments was published. This book provides dozens of charts comparing disease and death rates in homeopathic versus allopathic hospitals. This also included the epidemic diseases of scarlet fever, yellow fever, typhoid, etc. The homeopathic hospitals usually had 50-80% fewer deaths, depending on the disease compared.

The British government sponsored another early double-blind study during World War II. The experiment demonstrated that those who experienced mustard gas burns and were given homeopathic remedies experienced significant improvement, in comparison to those given a placebo. A 1982 review provided further substantiation of the statistical significance of this research.

Laboratory Evidence

The number one criticism of the scientific community has been the “infinitesimal” nature, or the dilution principle of homeopathy. Homeopaths do agree that once a remedy is diluted beyond 24X or 12C potencies, they are diluted beyond Avogadro’s Number, 6.02 x 10^23, which theoretically indicates that no molecules of the original substance are present in the final remedy. However, both laboratory and clinical results over the last 200 years have demonstrated definite effectiveness with remedies beyond this dilution.

A recent Nuclear Magnetic Resonance NMR study of 23 different homeopathic remedies showed that all 23 remedies and potencies tested had distinctive readings of sub molecular activity, while the placebos did not. This demonstrates that homeopathy’s function is not so much chemical as energetic.
Antiviral - A recent double-blind study has shown the antiviral effects of homeopathic remedies. Eight of the ten remedies tested inhibited viruses in chicken embryos from 50 to 100 percent, depending on the potencies used.

Heavy Metals - The respected journal, Human Toxicology, published a study showing homeopathic doses of arsenic eliminated crude doses of trapped arsenic previously fed to rats.

Lowered Serum Cholesterol - Four German scientists at a veterinary college showed homeopathic Chelidonium lowered serum cholesterol when given twice a day to rabbits on a cholesterol-rich diet.

Reduced Labor Problems - British veterinarian, Christopher Day, conducted several pilot studies demonstrating how homeopathic remedies reduced labor and mastitis problems in cattle, and stillbirths in pigs.

Pain Control - Scientists at a British school of pharmacy found rodents given Hypericum were able to inhibit pain response by remaining on a hot plate longer than the control group. When given Naloxone, which inhibits pain-killing endorphins, the protective effects of Hypericum were reduced, showing homeopathic Hypericum activates endorphins when needed. These rodents were free to walk off the hot plate whenever discomfort was noticed.

Allergies - Homeopathic Apis and Histamine have a significant effect on reducing the release of certain allergy-causing chemicals from basophiles, which demonstrate one reason for homeopathy’s positive effects on allergies.

In 1994, the internationally respected medical journal, The Lancet, published a study by David Reilly, M.D., demonstrating effective homeopathic treatment of allergic asthma.

Improved Immune Function - A respected pharmacology journal showed that homeopathic Silica had a significant effect on stimulating macrophages in mice, which destroy foreign particles, bacteria, and old cells.

Rheumatoid Arthritis - The British Journal of Clinical Pharmacology published a double-blind experiment on patients with rheumatoid arthritis. An impressive 82% of those given a homeopathic medicine experienced some relief of symptoms, while only 21% of those given a placebo experienced some similar degree of improvement.

Dental Neuralgia - Another double-blind trial was conducted on patients with dental neuralgic pain following tooth extraction. An impressive 76% of those given the homeopathic medicine Arnica and Hypericum experienced pain relief.

Vertigo and Nausea - The respected German Pharmacological Journal demonstrated a statistically significant improvement in reducing vertigo and nausea with a homeopathic combination formula.

Reduced Labor Times and Complications - French researchers recently completed a double-blind trial using a homeopathic formula to treat pregnant women. The study found this homeopathic formula reduced labor time and decreased abnormal labor. The average labor time of the women given the homeopathic formula was 5.1 hours, while the placebo group was 8.5 hours. Only 11.3% of the women given the homeopathic formula had any abnormal labor, while 40% of the placebo group had an abnormal labor.
**Childhood Diarrhea** - A study published in the May 1994 issue of *Pediatrics* showed the effectiveness of homeopathy in treating childhood diarrhea. The study, conducted by Jennifer Jacobs, M.D., was a randomized double-blind clinical trial comparing homeopathic medicine with placebo in treating acute childhood diarrhea.
Homeopathic Growth Statistics

The F.D.A. Consumer, one of our government’s magazines, reported the sales of homeopathic medicines increased 1000% from the late 1970s to early 1980.” March 1985.

A recent survey of French doctors revealed approximately 11,000 physicians use homeopathic medicines. As of the last official count, 20,000 French pharmacies now sell homeopathic medicines. This survey also stated six medical schools offer courses in homeopathy leading to a degree. Homeopathy is also taught in all pharmacy schools and four veterinary schools.

Homeopathy is growing so rapidly in France that a recent cover story of Le Nouvel Observateur, one of France’s leading magazines, noted that President Mitterrand and six medical school deans called for more research on homeopathy.

Homeopathy has received much attention in the popular and scientific press. Newsweek, Time, “The Today Show,” “CBS Morning News,” New York Times, Los Angeles Times, Boston Globe, UPI, AP, and National Public Radio are some of the media who have recently done one or more stories on homeopathy.

In 2006, the Swiss government concluded a multi-year, meta-study of the effectiveness and safety of homeopathy. Their findings verified homeopathic treatment has proven to be one of the safest and most cost-effective forms of health care known. They have since included homeopathic coverage in their national health insurance program.

The Washington Post, April 28, 1983, reported the number of physicians practicing homeopathy doubled from 1980 to 1983.

The New York Times, January 9, 1985, reported the number of visits to homeopathic physicians in England is growing at an incredible 39% per year. The London Times March 13, 1985, noted 48% of the physicians in England recommend homeopathy to some of their patients.

Homeopathy is experiencing widespread popularity in Europe, but is even more popular in Asia, especially India, Pakistan, and Sri Lanka. Homeopathy has spread like wildfire in India due to its effectiveness in treating acute infectious conditions and chronic maladies on the subcontinent. Presently, there are more than 120 four to five-year homeopathic medical schools, and 100,000 homeopathic practitioners in India.

Homeopathy is also growing in South America, Mexico, Greece, Belgium, Italy, Australia, South Africa, Nigeria, and the Soviet Union.

Solving Contemporary Health Care Problems

Homeopathy is the second most widely used system of medicine in the world, the first being Chinese herbal medicine, due to China’s large population. The growth in popularity of homeopathy in the United States has been around 25 to 50 percent per year for the last decade. This success is fueled by several factors:

- **Homeopathy is extremely effective.** When the correct remedy is taken, results can be rapid, complete, and permanent.
- **Homeopathy is completely safe.** Homeopathic remedies can also be taken with any other medication or supplements without producing unwanted side effects.
- **Homeopathy works in harmony with your immune system,** unlike most allopathic medicines, which suppress the immune system. For example, cough medicines suppress the cough reflex, which is your body’s attempt to clear the lungs.
- **Homeopathic remedies are not addictive** – once relief is felt, you should scale back on the dosage until you no longer need the product. If no relief is felt, you are probably taking the wrong homeopathic remedy.
- **Homeopathy is wholistic.** It treats all the symptoms as one, which in practical terms means that it addresses the cause of imbalance, not just symptoms. This often means symptoms tackled with homeopathy do not recur.

The Difference Between Homeopathic, Herbal and Nutritional Products

Homeopathy functions very differently from other remedies such as herbs, vitamins, and minerals. Foods, herbs, vitamins, and minerals all need to be broken down by digestion, and require tremendous energy for their conversion into micronutrients the body can use. For many who are ill or nutritionally depleted, this expenditure of energy on the cellular level is either impaired or impossible.

To apply highly concentrated nutritional supplements or herbs under such circumstances may create complications, such as toxicity or hypersensitivity associated with overburdening stressed organs. Homeopathy avoids all possible complications, since homeopathic medicines provide their effect through highly diluted micro-constituents and pure energy, referred to as "bioenergetic."

The Bioenergetic Paradigm

While herbs, vitamins, and minerals work on a biochemical level to change or support body chemistry, homeopathy works on a bioenergetic level to balance our higher communication networks.

All body functions are controlled and coordinated through energetic communication networks, such as our nervous system. Every chemical within our body has a particular charge, which responds very specifically to our energetic control networks. By balancing our energetic communications with homeopathy, the roots of our biochemical functions can also be restored. The bioenergetic realm of life controls the biochemical realm of life.

We have found the easiest and most effective way to rebuild health is to first restore communication networks within the body. The deeper workings of homeopathy can make our other efforts to enhance health much simpler. In fact, homeopathy will empower the body to respond much more effectively to our efforts in building health. As the inner integrity of our health is restored with
homeopathy:

- Recurring health patterns will stabilize and correct.
- Good eating habits become more effective.
- Herbal and nutritional supplements become more effective.
- Exercise efforts become more effective.
- Our efforts to manage stress and think more positively become more effective.

As we grasp more completely the power of these healing principles, we are able to take on a greater level of authority and control in our health and become more successful stewards of our bodies. Thus, we will become more effective in our efforts to attain and maintain optimal health.

Bioenergetic principles in homeopathic medicines provide quick results—often within 30 seconds or just a few minutes. Once a homeopathic medicine is sprayed in the mouth, it is picked up by sublingual nerve pathways under the tongue. The unique healing powers of homeopathy are then transmitted at the average nerve speed of 200 mph throughout the body. Within 5 to 7 seconds, the healing and restorative messages of the homeopathic remedy reach all 100 trillion cells of the body!

Homeopathy works so deeply within the inner fabric of the human body, actual cures have taken place. Even inherited problems and weaknesses, called miasms in homeopathy, have well-documented cures. With homeopathy, we possess another tool to help stop the inheritance of genetic problems and weaknesses from being passed on to our offspring.

**Summary**

Homeopathy is a time-tested, safe, and effective form of health care. By incorporating it into your practice, your patients will benefit and your practice will grow as they spread the word. The King Bio® staff is here to answer your questions. We also offer training programs to help you become more proficient in using our advanced contemporary homeopathy formulas in your practice. We look forward to working in partnership with you!
The Powerful Benefits of SafeCareRx

SafeCare®Rx formulas are uniquely created to meet the needs of today’s more complex and perplexing health care problems. Due to dramatic changes in disease patterns and our environment, SafeCareRx formulas offer effective solutions to these challenges. These formulations are designed for the majority of health problems you see in contemporary practice.

√ Comprehensive, Quality Homeopathics - SafeCareRx formulas are the result of the accumulated knowledge and research of many respected homeopaths and doctors who have many years of clinical experience.

The quality ingredients in our formulas are prepared from substances belonging to all three realms of nature - plant, mineral, and animal. The plant kingdom is the source of more than half of our remedies. Qualified specialists harvest plants in their natural habitat after passing a thorough botanical examination. All components are prepared in strict accordance with the Homeopathic Pharmacopoeia of the United States (HPUS) and current good manufacturing practices (cGMP) standards of excellence. Worldwide, Latin names are used for the specific identification of each homeopathic ingredient. Components from the plant kingdom are gathered according to specific procedures, such as harvesting a specific part of the plant at a specific season of growth (budding, flowering and so forth). This process is essential to provide the therapeutic quality of our formulas. The remaining substances come from the mineral kingdom, and a small number come from the animal kingdom.

√ High-potency, broad-spectrum homeopathics - In our SafeCareRx formulas, there are equal volumes of high-potency, broad-spectrum potencies or strengths in most ingredients: 10X, 30X, 100X, 1M, LM1, LM2 and LM3. In general, the lower 10X potency works at the more superficial levels of bodily function, such as skin and hair health. The middle potencies 30X and 100X work more in the realm of our glands and organs. The mental and emotional functions — even our genetic predispositions — are best enhanced with the higher 1M, LM1, LM2 and LM3 potencies. These potency ranges have been clinically proven to provide a higher percentage of results, faster results, and a higher percentage of actual cures with minimal aggravations or healing crises. Many companies only offer low potencies.

Making a homeopathic remedy is a very labor-intensive process. It actually takes 90 times the labor to make our 100X strength as it does to make a 10X strength, and a remarkable 990 times the labor to make 1M strength. King Bio finds it well worth this extra effort to provide superior results.

√ Multiple Ingredients - SafeCareRx formulas, on average, contain more than 16 different ingredients, each made in 5 to 7 high potencies (mentioned above), totaling more than 100 individually made ingredients in a single formula. This progressive formulating process provides a broader therapeutic spectrum that delivers powerful results. The SafeCareRx multi-ingredients, combined with the high, multiple potency process, provide faster, more effective results.
**Pure Water Base** - Working with hypersensitive people for nearly three decades we have developed the least allergenic base: WATER.

Our pure, water-based homeopathic line has no alcohol, sugar, dairy, gluten or glycerin. King Bio® has developed a proprietary method of ultra-purification we call Bio-Energetically Enhanced™ water. In Dr. King’s experience, this water is crucial to the advanced success of SafeCareRx, because it:

- Enables our formulas to be more resistant to possible antidotes such as low-level radiation, X-rays at airports, strong aromatics, and chemicals;
- Allows us to include more ingredients and more potencies in our formulas, resulting in a broader therapeutic spectrum; and
- Provides better absorption, utilization and therapeutic potential.

**Safety** - Especially important to SafeCareRx is the safety of our clients and patients. Everyone from newborns to the elderly can safely use these medicines. They complement any procedural system, nutritional and herbal remedies, or conventional drugs and medical procedures. There are:

- No known negative side effects
- No contraindications
- No known reactions with other drugs
- No known allergic reactions
- No toxic chemical poisoning potentials
- No addictive or habit-forming properties

**Fast Acting** - Symptomatic improvement can often be noticed within **30 seconds** or just a few minutes. Homeopathy’s unique absorption into the sublingual nerve pathway is the fastest delivery known.

**Easy-to-Use** - Our one-handed, medically metered pump spray is the fastest, easiest, and most accurate dosage delivery system available. SafeCareRx bottles conveniently fit into a pocket or purse for easy travel. No more opening and closing bottles, no measuring, no spilling, no more fumbling with blister packs or eyedroppers, no touching, no contamination, no antidoting, and no problems taking SafeCareRx formulas.

**Long Shelf Life** - All SafeCareRx formulas will retain full potency for a period of at least three years.

**Environmentally Friendly** - King Bio uses recyclable bottles that are made of the highest quality, BPA-free, PET #1 plastic, which is not associated with potential leaching into the product. SafeCareRx formulas are ecologically designed for our health, as well as our environment. PET plastics require less energy and are more economical and ecological to make and recycle than glass.

**Credibility** - Natural homeopathic medicines have become the first of all natural remedies to be recognized by the FDA as a drug product. SafeCareRx formulas offer a safe and natural solution
backed by science, clinical experience, and most importantly, the tests of time and adversity. All SafeCare®Rx formulas are carefully prepared according to the quality standards of the Homeopathic Pharmacopoeia of the United States (HPUS). The federal Food, Drug, and Cosmetic Act (FDCA), the U.S. legislation that officially classifies and defines all drugs and recognizes the HPUS. Since 1989, King Bio® has operated as an FDA-registered natural pharmaceutical manufacturer, operating in accordance with current FDA good manufacturing practices (cGMP). A National Drug Code (NDC) number has been assigned to each SafeCareRx formula.

√ Synergy – Our unique formulation process allows us to offer products with a greater degree of effectiveness than ordinary homeopathic remedies. Our proprietary research has allowed us to develop synergistic formulas where the total effect is truly greater than the sum of the parts.

SafeCareRx formulas work on the whole person at all levels of life: physically, mentally, and emotionally. Other benefits your clients or patients may experience include:

♦ Increased vitality and alertness
♦ Better sleep and peacefulness
♦ Increased sense of physical, mental, and emotional well-being

Finding the Right Formulas

Homeopathy is a highly individualized healing art, and to discover its broad spectrum of therapeutic potentials, you need a way of discerning which remedies support the healing process. The practitioner must have an insightful and open approach that seeks to deeply explore all possible causes, or simillimums, and the corresponding products which match those symptoms. Diligence in seeking and finding all the necessary homeopathic remedies is the key to optimal success.

Our Physician's Reference Manual has a Product Listing, Product Descriptions, and Repertory to help you discover the potential formulas for each individual case.

The individual product descriptions display therapeutic actions on the body in the “Indications for Use” and “Remarks” sections. While you are reviewing specific symptomatic patterns with the patient/client, specific formulas will come to mind to test or try. Each product description also has a “Complementary Formulas” section. This section lists the formulas in descending order of importance based on the amount of positive responses Dr. King and other physicians have found in their practices. The Repertory offers a thorough A-Z listing of health problems/conditions with a priority list of SafeCareRx formulas to consider. In addition, the Contemporary Homeopathic Enhancement Systems & Solutions (C.H.E.S.S.) chapter, with accompanying forms, will teach you how to use a Personal Health Appraisal and History along with various testing techniques for finding the correct formulas.

Indications for use on each SafeCareRx bottle may suggest the obvious formula for symptoms; however, because our bodies are unique, the underlying causes of the same health condition between two individuals with similar symptoms may be different, requiring different SafeCareRx formulas.

For example, Dr. Johnson has two patients, John and Rick. Both have congestion, sneezing, and headaches. In reading the indications for use, both are given Allergy/Hay Fever Reliever. John
receives quick relief and his symptoms greatly diminish within 12 hours, suggesting that healing is taking place. Rick, however, doesn't make the same improvement. Dr. Johnson then looks at the SafeCareRx Complementary Formulas listed under Allergy / Hay Fever Reliever. Constitutional Enhancer is listed first, since 60% of the population has respond favorably to that formula. Sinus Relief is listed next in order of priority. Dr. Johnson gives Rick the Sinus Relief formula, and substantial relief is gained within hours.

Following through with this procedure is key to finding the missing pieces to your patient’s health. The degree to which you follow through will determine your level of success in overcoming the difficult or resistant problems. In addition, Bio Response Testing (BRT), covered in the C.H.E.S.S. chapter, provides powerful tools for discerning the appropriate formulas that your patient may require.

The SafeCareRx Constitutional Enhancer and miasm formulas can also enhance the body’s inner healing abilities. Always consider Constitutional Enhancer or one of the miasm formulas as a foundational base to enhance the symptom-specific formulas for optimal results. (For more detailed information about Miasms see the "Constitution" category of products and the accompanying article by Dr. King.)

The formulas in the Cleansing & Detox category are often used to alleviate common roadblocks to health. SafeCareRx formulas should be checked regularly during the treatment process. The practitioner that focuses on the whole person will commonly apply between 5 to 15 formulas during a 12-month period treatment time frame to maximize their patient’s healing process.

Between the Physician's Reference Manual, our comprehensive Personal Health Appraisal (P.H.A.), and our testing procedures, you will be well-equipped to manage the great majority of chronic recurring health problems perplexing our society today. In addition, the procedures covered in the C.H.E.S.S. chapter will assist you in developing the knowledge and experience for gaining optimal success. These contemporary approaches include breakthroughs in protocols and procedures to dynamically equip you with the ability to communicate directly with the body. When you can discern which homeopathic formulas to choose for your patients or clients, you can bring an enhanced level of care to them and your practice.

**DOSAGE: Be Flexible to Be Successful!**

Since the body has unique requirements, optimal dosages can vary with each individual. In general, using 3 sprays, 3 times per day (one adult dose), is a 35-day supply in a single bottle. Although patients may start with a dosage more frequent than 3 times a day, they will lessen the dosage as symptoms improve, and finish with a dosage of less than 3 times a day. There is no need to be concerned about excess dosing producing any toxic side effects. The important thing is to establish the appropriate dose until results occur and vary the dose according to symptomatic change.

If there are no results, gradually increase the dose frequency until symptoms begin to clear. As symptoms do begin to clear, reduce the frequency accordingly.

SafeCareRx formulas are designed to correct the underlying causes behind the health problems.
Depending on the conditions, if no changes occur within a few days to a few weeks:

- Try another related SafeCareRx formula. Related formulas can be found in this manual’s Product Listing under each formula and in the Repertory section near the back of the book, alphabetically.
- **King Bio** offers free consultation services that are available from 8:30 a.m. – 5:00 p.m. EST to *health care professionals at 866-298-2740*.

For best results, take doses anytime between meals, at least 10 minutes or more before or after eating, drinking, or brushing teeth. Whenever possible, allow a few minutes between doses when taking more than one SafeCareRx formula at a time. Bio Response Tests (BRT) can help you to discern which formulas can be taken together and which products to take separately. Please refer to our C.H.E.S.S. Chapter for more information on Bio Response testing. There is no risk of overdosing.

**Note:** Taking more than the recommended dosage at one time will not add additional therapeutic value. Increasing the frequency of the dosage will add therapeutic value.

**How Soon Can Results Be Expected?**

In acute conditions, the appropriate remedy can act within minutes. It is common to see a child who is screaming in pain with an earache drop off to sleep one to two minutes after a dose of the appropriate remedy. Results can be slower in chronic conditions.

Roughly, for every year of illness, it may take a month of treatment and multiple formulas to receive maximum results.

Though astounding improvements often take place, do not be discouraged if instant improvements do not occur in chronic or long-term conditions. In the chronically ill and hypersensitive patient, the vitality of a person needs to be first strengthened. There may even be a slight chance of temporary worsening of symptoms. This is usually short-lived and followed by improvement.

Each ingredient is in equal volumes of 10X, 30X, 200X, 1M, LM1, LM2, LM3 and LM5 potencies.

**ICV Clenz**

*Indications for Use:* For fast relief of ileocecal valve symptoms: sensitivity, pain or pressure in lower right abdomen, dark circles around eyes, bad breath, toxic taste in mouth, ringing in the ears, toxic intestinal irritations.

*Remarks:* ICV stands for Ileo-Cecal Valve. This valve is between the small and large intestine. When irritated or inflamed the valve spasms open causing toxins and waste product to back up into the small intestine and absorb into the body. This can cause a broad spectrum of symptoms including immune problems, low back pain and reproductive problems. Note: Consult a physician for any severe abdominal pain.
**Complementary Formulas:** Constitutional Enhancer • Constipation Relief • Indigestion Relief • Blood & Kidney Detox • Liver Detox • Lymph Detox • Heartburn Reliever • Allergies: Food Chemicals • GallPlex

**CONSTITUTION**

*(Note: For a greater understanding of miasms and how to manage them, please refer to the end of this section for a detailed article by Dr. King.)*

**CA Miasm**

**Indications for Use:** For fatigue, difficulty sleeping, flu symptoms, fears of unknown origin, childhood disorders.

**Remarks:** Consider as a support for cancer, not a replacement for standard treatment procedures. CA Miasm can be commonly connected to ailments associated with nursing a sick or dying loved one over time, fears of getting cancer, juvenile arthritis, juvenile diabetes, learning disorders, mongolism Down's Syndrome, repeating pneumonias, chronic fatigue syndrome, chronic viral infections, AIDS, moles, birthmarks, chronic insomnia with unknown cause, difficulty thinking and making decisions, stroke, whooping cough, obesity, sinus, allergies, swollen lymph glands, cysts, tumors, panic attacks, agoraphobia, low self-esteem, pernicious anemia, diabetes, tics, pale skin, blue sclera of the eyes, mononucleosis, sensitive to criticism, excessive sense of duty. Special cravings for ice cream and chocolate commonly exist.

The CA Miasm has two sides emotionally. On one side they feel low-spirited, hopeless, overwhelmed, over serious, irritable, victims of circumstances, and that their conditions will never improve. On the other side, a bipolar manic type has a martyr complex where they find themselves taking care of everyone but themselves.

A unique aspect of the Cancer Miasm is its connection to ones personal finances, and feeling like there is never enough money to meet ones needs. The poverty complex can be significantly helped with the CA Miasm remedy. The CA Miasm patient may have difficulty thinking or making decisions.
Complementary Formulas: Any formulas associated with specific symptomatic expressions.

CA Miasm Ingredients: Aconitum napellus • Arsenicum album • Cadmium sulphuricum • Conium maculatum • Gelsemium sempervirens • Hydrastis canadensis • Phytolacca decandra. Each ingredient is in equal volumes of 10X, 30X, 100X, 1M, LM1, LM2, and LM3 potencies.

Constitutional Enhancer

Indications for Use: For a broad spectrum of symptoms related to the functions of the immune, nervous, digestive, cardiovascular, respiratory, reproductive, musculoskeletal, and lymphatic systems.

Remarks: This is a foundational formula for the immune system. The majority of people will test positive for this product. Consider when patient progress stalls or plateaus. Can be effective for those who are chronically ill, or for those seeking to attain a higher level of health and life.

Constitutional Enhancer Ingredients: Aconitum napellus • Arsenicum album • Baryta carbonica • Bryonia • Calcarea carbonica • Cantharis • Gelsemium sempervirens • Graphites • Hydrastis canadensis • Kali iodatum • Lachesis mutus • Lycopodium clavatum • Mercurius vivus • Natrium muraticum • Nux vomica • Phosphorus • Phytolacca decandra • Pulsatilla • Rhus toxicodendron • Sepia • Silicea • Sulphur. Each ingredient is in equal volumes of 10X, 30X, 100X, 1M, LM1, LM2, and LM3 potencies.

Environmental Adaptation: Cold/Damp

Indications for Use: A natural aid for symptoms related to cold, damp environments: back, neck, & joint pain, fatigue, swollen, cold & numb extremities, difficult respiration, internal coldness, cough, sore throat, swollen glands, weakness, drowsiness, runny nose.

Remarks: Consider for individuals having difficulty adapting to the climate in which they live or are visiting, as well as indoor environments. Use preventively and for general health enhancement.

Each ingredient is in equal volumes of 10X, 30X, 100X, 1M, LM1, LM2, LM3, and LM5 potencies.
**PSOR Miasm**

**Indications for Use:** For symptomatic relief of: skin eruptions, itching, eczema, acne, food sensitivities, minor breathing difficulties, fears, anxiety, nervousness.

**Remarks:** Psora means “itch” and is considered the miasm of deficiency, affecting the bowel and skin primarily. Psora is the oldest known miasm and is referred to as the “mother of chronic disease.” Approximately 80% of the population has some component of Psora affecting them. It is the oldest and deepest acting of the miasms. As the name implies, psoriasis is connected with most skin disorders. Breathing difficulties, such as asthma, bronchitis, environmental allergies, and hay fever are also associated. In addition, cardiovascular disorders, and blood sugar imbalances, such as hypoglycemia and diabetes are also involved.

Consider for people who may be highly susceptible to bad news, shock or fear. This miasm is associated with individuals who suffer from a fear of death and a generally negative personality or belief system. These individuals have unusual beliefs about food, they suffer from food allergies, growth problems, mal-assimilation, failure to thrive, skin eruptions related to digestion, pustules, burning or stinging eruptions. Other symptoms include nausea headaches, sensitivity to cold and drafts, colitis, ringing and roaring in ears, and muscle spasms.

Psora types are timid, reserved, indifferent, intelligent, apprehensive, oversensitive, restless, easily fatigued, and may feel bottled up inside, unable to express themselves and feel as though they are living in a self-imposed prison. Psorics can experience anxiety and fear of criticism. They can be stubborn, independent, afraid to take chances and are inhibited. They may often times fail to finish what they start. They feel better lying down, scratching, and can be constantly hungry with a craving for hot foods. They have tendency to have an unkempt appearance.

Psorics may worry about money even though they have plenty of it. Psora makes one worry and even dream about losing money. The cancer miasm can create financial hardship, but psora simply creates the worry.

**Complementary Formulas:** Any formulas associated with specific symptomatic expressions.

**PSOR Miasm Ingredients:** Alumina • Baryta carbonica • Borax • Calcarea carbonica • Graphites • Hepar sulphuris calcareaum • Lycopodium • Natrum muriaticum • Sulphur. *Each ingredient is in equal volumes of 10X, 30X, 200X, 1M, LM1, LM2, and LM3 potencies.*

**SYC Miasm**

**Indications for Use:** A natural aid for warts, allergies, musculoskeletal aches, rheumatism, candida, yeast, vaginal irritations, herpes, general inflammations of the mucous membranes, sexual excesses.

**Remarks:** This, as with all miasms, does not necessarily indicate that one has acquired this disease in their lifetime. As with other miasms, the probability is that you have inherited the miasm from generations ago. Sycotic means “fig wart.” Dr. Hahnemann, the founder of homeopathy and this miasm, observed the common connection of infectious gonorrhea with small warts over the body. Although pronounced the same as “psychotic,” it is not related.

The Sycotic Miasm is the miasm of excess relating to conditions such as drug abuse, alcoholism, greed, diabetes, and auto-immune responses. Other growths may include condylomatalata, cysts, tumors or sclerosing of organs. Consider for excess mucus secretions, whether vaginal, sinus, lung, stool or ear. Mold allergies. Negative effects from living in damp climates. Pathological growths such as warts, birthmarks, moles, ovarian cysts, fibroid tumors, etc. This is the main miasm responsible for rheumatoid arthritis, multiple sclerosis, fibromyalgia, herpes, impotence, and sterility. Peptic ulcers, colitis, early graying of hair and general slow recovery is associated with this miasm.
Mentally and emotionally, this miasm produces a skeptical, mistrustful, suspicious, non-believer. Jealousy, selfishness, exploitiveness, and careless pleasure seeking are characteristic of the miasm. Individuals suffering from this miasm can be very hard to convince of a new viewpoint or that life will ever improve.

**Complementary Formulas:** Any formulas associated with specific symptomatic expressions.

**SYM Miasm Ingredients** Aconitum napellus • Cantharis • Gelsemium sempervirens • Natrum sulphuricum • Picricum acidum • Pulsatilla • Sepia • Staphysagria. *Each ingredient is in equal volumes of 10X, 30X, 200X, 1M, LM1, LM2, and LM3 potencies.*

**SYP Miasm**

**Indications for Use:** A natural aid for mental and emotional sensitivities, mood changes, cardiovascular weaknesses, alcoholism, paranoia, obsessive attachments to a person or idea, family history of mental disorders.

**Remarks:** The Syphilitic Miasm is the miasm of destruction. The brain, nervous system, blood, and bone are targeted. Osteoarthritis and other degenerative deforming conditions of the body are associated. Consider for depression and suicidal tendencies, incest - desire for or as a result of; birth defects, cleft palate, nerve diseases, heart diseases, emaciation, skin, mouth or stomach ulcers, intractable pain, hepatitis, shingles, laryngitis, rapid heartbeat, craving for alcohol, and ovarian disorders.

The Syphilitic Miasm patient will have difficulty following directions for cure due to their self-sabotaging and destructive behavior. They could be cold, ruthless, and unfeeling. They bear little conscience or regard for life. They can be spiteful, hateful, revengeful, cruel, jealous, and judgmental toward others with a quick temper. Use for all forms of obsessive behavior, such as anorexia, self-criticism, and addictions. Hypochondria is not uncommon.

**Complementary Formulas:** Any formulas associated with specific symptomatic expressions.

**SYM Miasm Ingredients:** Arsenicum album • Aurum metallicum • Baryta carbonica • Hydrofluoricum acidum • Kali iodata • Lachesis mutus • Mercurius vivus • Nitricum acidum • Nux vomica • Phytolacca decandra. *Each ingredient is in equal volumes of 10X, 30X, 200X, 1M, LM1, LM2, and LM3 potencies.*

**TUBR Miasm**

**Indications for Use:** A natural aid for: respiratory weakness, swollen glands, sore throat, night sweats, fearfulness, hyperactive children, restlessness.

**Remarks:** The TUBR Miasm person will commonly feel exhausted, find it difficult getting out of bed in the morning and feel like catnapping during the day. Then at night, they may spring to life and find it difficult to sleep, experience nervousness or restlessness. The TB patient is very changeable, tired one minute and restless and ready to go the next minute. Consider for children with two personalities: one sweet and loving; the other mean, hurtful, and destructive.

Chest and lung problems, such as chronic respiratory problems and pneumonia are common. Wandering pains such as neuralgias, especially of the head, and arthritis can be experienced (especially with changes in weather). Kidney problems, psoriasis, cravings for alcohol, weight loss, excess hunger, eating disorders, Tourette’s Syndrome, epilepsy, phobias, fear of animals, milk cravings, milk allergies and cat allergies are common. Sensitivity to air pollution, thunderstorms, barometric and ospheric changes are common.
The changeable nature of the TB Miasm assures that most symptoms don't last long or move to another area of the body. They can be generally weaker and susceptible to seasonal ailments, usually catching whatever is going around. Although they tire with excess activity, they feel better when moving about. History of TB in the family is a good clue the miasm exists.

Mentally and emotionally, the changeable nature of TB also exists. They can get bored very easily. They like to travel. They have changeable moods and can quickly change from good-tempered to disagreeable and angry. They can be very opinionated, even on subjects they know little about and do not care if they are correct or not. The TB patient enjoys swearing and likes to get even or set people straight on matters. They may also have an aversion to work.

Complementary Formulas: Any formulas associated with specific symptomatic expressions.

TUBR Miasm Ingredients: Antimonium tartaricum • Arsenicum album • Belladonna • Bromium • Calcaria phosphorica • Chlorinum • Lobelia inflata • Phosphoricum acidum • Phosphorus • Silicea • Sulphur. Each ingredient is in equal volumes of 10X, 30X, 200X, 1M, LM1, LM2, and LM3 potencies.

Contemporary Approach to Correcting Miasms

Dr. Frank King

What are miasms?
Science has shown us that we are designed to be healthy. We all possess mechanisms resident within us to attain and maintain great health. Dr. Samuel Hahnemann, the “father of homeopathy,” discovered that susceptibilities and tendencies toward disease occur when our normal healthy mechanisms break down. The sicknesses we suffer from today are not just what we have acquired from this lifetime, but from thousands of years of inheritance passed on to us in genomic or genetic code. The remarkable restorative powers of homeopathy can actually clear and correct the inherited negative tendencies toward disease within ourselves and our offspring.

The term “miasm” was used by Hahnemann to describe the trans-generational causes of disease. The word “miasm” is defined as an obstacle to cure. Hahnemann asserted that unless the “obstacle to cure” is dealt with, the cure of disease will always be incomplete. In modern terminology, “miasm” means diathesis or constitutional susceptibility or predisposition to a particular disease. The deeper roots of diseases can be traced back through generations to 5 primary diseases he called miasms. The good news is that these miasms can be corrected and cleared with homeopathy.

The five miasms are Cancer, Gonorrhea Sycotic, Syphilis, Tubercular TB, and Psora. Miasms alter the ideal genetic blueprint for our health, affecting our entire being, physically, mentally, and emotionally. The deeper we go in building and restoring our health to its highest levels, the greater our chances to discover the probability that we may actually have multiple miasms, and perhaps, all five miasms.

Miasms can be either acquired or inherited. One can acquire a miasm, for example, by contacting gonorrhea at the age of 18 years. When treated with antibiotics, this form of suppressive therapy can cause the disease to go dormant and become active or show up later in life in the form of allergies, sinus, herpes, vaginitis, warts, tumors, jealousy, selfishness, or uncontrolled sexual desires. Hence, acquired miasms are acquired during our life.

The majority of miasms, however, are inherited. The chances of acquiring miasms from thousands of years into our family tree are much greater than what we may have acquired in our own lifetime.
Inherited miasms can be active or dormant. An active miasm is when the miasm is causing a present symptomatic picture or expression related to the symptoms associated with that miasm. (See the symptoms listed under each of the following SafeCareRx miasm formulas as a good general guideline.) A person does not have to have all the symptoms to have the miasm. The best time to consider using a miasm formula is when the symptoms are present. A dormant miasm is one hidden deep within the body that is not expressing any of its possible symptoms. It is recommended not to attempt treating dormant miasms unless other testing procedures such as electro diagnostic or reflex response tests indicate the need for a specific miasm formula.

Miasms are not hard to treat with homeopathy. They will, however, show up throughout our lives, especially as we go through the healing and restorative processes during homeopathic treatment. Most people have more than one miasm. The same or different miasms can show up periodically throughout the healing process. Homeopaths have experienced how miasms exist in various layers within the body and understand that as we work at correcting disease and building health, it is like peeling away the layers of an onion. Regular homeopathic formulas work to strengthen and restore health to the body according to the symptomatic expressions of the body. When these conditions tend to recur or be non-responsive, a deeper acting remedy - like a miasm formula - may be needed to more completely correct the condition. As we continue to peel away the disease layers impairing our normal healthy expressions, we will usually discover various miasms along the way.

Each of the miasms has particular homeopathic ingredients that are synergistic to their complete elimination. SafeCare®Rx miasm formulas use combinations of these synergistic ingredients to most effectively correct and cleanse these miasms from our bodies. Using our triple potency approach, we mix each one of the ingredients into equal volumes of 10X, 30X, 200X, and 1M, LM1, LM2, LM3 potencies. These high potency formulas work deeply, to more completely help cleanse both ourselves and our future generations of these underlying causes of susceptibility to disease.

The eradication of miasms is essential to both the restoration of our health and the eradication of disease from our planet. I have practiced homeopathy long enough myself to see the genetic disease patterns in children corrected and to observe the liberation of those diseases in their offspring as well. I have witnessed this remarkable healing phenomenon in cases such as childhood obesity, allergies, breathing disorders, skin disorders, certain behavioral disorders, and in anxious or nervous people. What a wonderful reward not only to see both children and adults healed of devastating genetic or life-long health problems, but to also see their children grow up free from inherited family health problems and weaknesses.

How do you treat miasms?
Miasms are deeply matrixed – or integrated – into our innermost being from our family tree over thousands of years. Although they are not difficult to correct with homeopathy, they are not always wiped out in a single blow.

Homeopaths have shown how disease patterns from the lives of our ancestors are trapped in and throughout the layers of our lives. These layers are like clear overlays seen on global maps demonstrating how global shifts and changes in boundaries of countries have taken place over time.

SafeCare®Rx miasm formulas are best used as intermediary remedies. While applying standard homeopathic and other health enhancement therapies, the need for the SafeCare®Rx miasm formulas will arise at various times. Treating miasms can cause remarkable changes in one’s health. Commonly, these changes can cause both wonderful, enlightening, euphoric experiences as well as times when more intense cleansing crises may occur, creating temporary discomfort of the
eliminative or cleansing processes. Some of the commonly experienced symptoms may include emotional releases, skin breakouts, itching, fever, fatigue, bowel movement changes, breathing changes, and various forms of pain. These symptoms can be severe at times but they are also temporary and non-damaging to the body. Remember, the body is orchestrating the healing crisis and will not harm or cause any permanent damage, even though it may feel like it at times. Although the healing crisis is not always comfortable or convenient, it is essential to our optimal healing and restoration!

It is best to monitor patients closely when using the miasm formulas, and explain that there is a 60% chance of experiencing some form of cleansing response. Explaining ahead of time makes a big difference in your patient’s attitude when going through a healing crisis. When enduring these uncomfortable times, it is much better to be praised for your wisdom than to be cursed in distrust!

Because of the possible volatility of symptoms when treating miasms, I don’t recommend starting a new patient on a miasm treatment who has not had experience with natural healing or detoxification. They may not be strong enough to handle the elimination of the miasms in the most graceful of ways, especially if the patient is in a weakened state of health. I recommend addressing the primary symptoms with SafeCare®Rx symptom-specific formulas first, along with any of the SafeCare®Rx detox and drainage formulas. These products will help strengthen and restore the natural healing and eliminative functions of the body.

As the patient gets stronger during basic homeopathic treatment, they will be better equipped to deal with miasm treatment. Miasm formulas are great to use when people don’t respond to homeopathic treatment or reach plateaus where they seem to level off and get stuck in their health enhancement. Miasms have a tendency to show up periodically over years throughout the healing processes. Even miasms that didn’t show up previously in testing may show up later during the treatment program, as more of the layers of disease have been peeled away. Either the same miasm or different miasm formulas will commonly be needed periodically over our lives. Almost everyone has at least one miasm; many people have more than one. Very ill patients can have many miasms.

Treatment with a SafeCare®Rx miasm formula may last for a few days to a few months at a time. Dosages can vary from 2 to 6 times per day. Again, any forms of biofeedback or reflex response tests are the best guide to dosage and length of treatment and when to repeat treatment.

SafeCare®Rx Constitutional Enhancer should be utilized similarly to the miasm formulas. The functions of the SafeCare®Rx Constitutional Enhancer are very similar and complementary to the miasm formulas.

For more information on miasms and the miasmatic types, see the SafeCare®Rx miasm formulas listed in this Physician’s Reference Manual, Hahnemann’s Chronic Diseases, Taberts’s Art of Cure by Homeopathy, Kent’s Lectures on Homeopathic Philosophy, Allen’s Chronic Miasms, or Ortega’s Notes on the Miasms or contact us at 866-298-2740.

As practitioners, we have focused on correcting the underlying causes of disease. Using homeopathy, we can now dynamically expand this focus in the most significant applications. Homeopathy, with its vast accumulation of research and proven clinical data, can empower you to make a more significant healing impact on society.
**DIGESTION**

**Candida**

**Indications for use:** Temporarily relieves symptoms due to overgrowth of Candida albicans yeast: yeast infections, thrush, nail fungus, constipation, headache, nausea, itchy skin, fatigue, diarrhea, flatulence, bloating, forgetfulness, sleeplessness, and cravings.

**Remarks:** Candida overgrowth can be a pervasive condition affecting virtually every organ of the body, as well as muscle tissue. Men, women, children, and even babies can experience Candida imbalances. Consider this remedy as a complement to your regime of natural medicines for a variety of health concerns.

**Complementary formulas:** Upper GI • Lower GI • Heavy Metal Detox • Constitutional Enhancer • Consider all products related to the specific symptomatic expressions.

**HPUS Ingredients:** Abies canadensis • Allium cepa • Allium sativum • Aloe socotrina • Antimonium crudum • Asafoetida • Borax • Candida albicans • Candida parapsilosis • Carpinus betulus, flos • Ignatia amara • Lachesis mutus • Lycopodium clavatum • Malus pumila, flos • Olea europaea, flos • Phosphoricum acidum • Phytolacca decandra • Pulsatilla • Sabadilla • Sticta pulmonaria • Sulphur • Thuja occidentalis. Each ingredient is in equal volumes of 12X, 30X, 100X, 1M, LM1 LM2, and LM3 potencies.

**Constipation Relief**

**Indications for Use:** For temporary relief of symptoms of constipation: irregularity, hard, dry stools, great straining, rumbling and bloated bowels, mucus in stools, associated headache.

**Remarks:** Consider for infants, children and adults. Can help the most difficult cases as well as the occasional constipation from traveling. This is not an irritant that causes loose stools. Be sure to ask your patients how often they have a bowel movement. You will be surprised how often they will say once or twice a week and consider that normal.

**Complementary Formulas:** Constitutional Enhancer • Indigestion Relief • ICV Clenz • Colic Relief • Blood & Kidney Detox • Liver Detox • Lymph Detox • GallPlex • Acid Clenz • AddictaPlex • Appetite Control • Weight Control

**Constipation Relief Ingredients:** Alumina • Bellis • Causticum • Collinsonia canadensis • Hydrastis canadensis • Lac defloratum • Natrum muriaticum • Nux vomica • Plumbum metallicum • Sepia. Each ingredient is in equal volumes of 10X, 30X, 100X, 1M, LM1, LM2, and LM3 potencies.

**Diarrhea Relief**

MIND & BODY

For Total Health of Body, Mind & Emotions

Our level of mental, emotional and physical health is directly connected to living complete and fulfilling lives. Since we can all benefit from an enhanced state of being, supporting the necessary levels of our health is essential. Dr. King developed the Mind & Body formulas to specifically support mental and emotional health, since it is the foundation of a comprehensive health program.

The mental, emotional and dream realms provide keynote symptomatic patterns that lead the homeopathic doctor to the core remedies that impact the patient with the most effectual, positive, life-changing results. SafeCareRx Mind & Body formulas are designed to be safe and effective for all individuals, from young children to grandparents, allowing us all to grow and develop into our full potential!

The SafeCareRx Mind & Body line is designed to:

- Actively correct chronic, recurring and resistant health problems
- Proactively enhance our ability to maximize our health.

Other healthcare approaches have been developed to support mental and emotional health, however, the powerful benefits provided by the synergistic combination of flower essences and homeopathic ingredients reaches a new level of therapeutic ability, complementary to all forms of conventional care, from counseling to prescription medications.

The multi-ingredient, multi-potency method of formulation has been designed and carefully refined through decades of clinical experience. King Bio uses key ingredients backed by double-blind studies and clinical confirmations which have withstood the tests of time and adversity. By using these select ingredients and powerful formulations in the research, development and manufacturing of the SafeCareRx Mind & Body (M&B) formulas, we provide medicines which empower you and your patients to reach higher levels in health.

Homeopathy has accumulated research and double-blind studies for over 200 years called "provings." Provings confirm the specific mental and emotional therapeutic applications of hundreds of substances that have clinical evidence of efficacy and safety. This unique and detailed clinical information is listed in numerous books called homeopathic Materia Medicas and Repertories. These books describe not only the mental and emotional, but also the physical conditions related to each substance. In this way, we are able to determine specific mind-body connections and create homeopathic medicines that work on all levels.

SafeCareRx M&B formulas include a synergistic blend of carefully selected homeopathic ingredients and flower essences brought to 7 homeopathic potencies using our Bio-Energetically Enhanced pure water base. This process allows each ingredient to reach a powerful level of efficacy which they could not achieve alone. The Mind & Body formulas are usually made in equal volumes of 10X, 30X, 100X, LM1, LM2, LM3, and LM5 potencies. This broad-spectrum of therapeutic potencies is designed to work deeply at every level of our health, and is essential to our mental, emotional and physical well-being.

SafeCareRx M&B formulas are designed to complement other therapies, programs or medications. These formulas correct, restore, and enhance mental and emotional health, including the deepest emotions, memories, and innate needs of our inner selves. They assist our powers of choice, responsibility and accountability in life.

Enjoy the journey!
SafeCareRx M&B formulas offer your practice the following advances and advantages:

Note: In the Physician's Reference Repertory, the first product listed next to the symptom is the primary remedy Dr. King suggests for that condition. If the individual does not test positive for that remedy, test other remedies that match the individual case personally or in the order listed under that condition. In many instances it would be beneficial to consider testing for the Constitution formulas along with more obvious system specific formulas for optimal results.

President
Dear Colleague,

King Bio® established C.H.E.S.S. to equip doctors with valuable tools to overcome the common, chronic, and recurring health problems plaguing our society today.

In 1979, the King Health Center was created with a team of 4 doctors and 13 support staff. We researched, tried, and tested virtually every method of enhancing natural health care from around the globe. Overwhelmingly, homeopathy proved to be the most effective modality to complement natural health care. Homeopathy actually works bioenergetically to correct core interferences at the deepest levels, in order to achieve the highest levels of health.

This work developed into a highly successful practice, backed by diagnostic data which demonstrated successful correction of a broad spectrum of conditions. As our clinical results grew exponentially, we became inspired to share our experiences with other professionals.

C.H.E.S.S. - Contemporary Homeopathic Enhancement Systems and Solutions is an uncomplicated, turnkey, procedural system that can be effectively implemented overnight for a broad-spectrum, high-volume practice. This empowering program will provide everything you need to get started, from protocols and procedures to products. C.H.E.S.S. is about effectively helping a greater number of patients.

I am committed to sharing the success of our system with my colleagues. The powerful concepts and procedures of this system, fine-tuned for you during years of field-testing, are outlined here. Read, apply, and enjoy the fruits of these quality services. I encourage you to transform your practice today.

Frank King, ND, DC
President

By applying C.H.E.S.S., I personally:

- Improved patient outcomes
- Increased direct referrals
- Increased income
- Increased patient base
- Decreased insurance dependence
- Improved community acceptance
- Enjoyed greater personal fulfillment

Dr. King’s Mission for Practitioners

WE ARE COMMITTED TO:

- TEACH you the powerful, therapeutic tools of homeopathy and how to easily and successfully integrate them into your practice.
- EQUIP you with the tools necessary to work with the body as a whole, both biochemically and bioenergetically.
- ASSIST you in fulfilling your destiny as a doctor of the whole person.

Turnkey Training Program

Contemporary Homeopathic Enhancement Systems and Solutions (C.H.E.S.S.) is an integrated, functional system of natural health care. By design, C.H.E.S.S. complements and enhances your practice by the use of scientifically proven, time-tested principles of contemporary homeopathy, with a streamlined case management program. After two decades of clinical research, C.H.E.S.S. brings the many benefits of homeopathy to integrative health care practices. This program offers valuable features and benefits, including:

1. An easy-to-use diagnostic approach that includes practical, step-by-step guides.
2. An efficient procedural method for solving challenging cases.
3. A comprehensive line of homeopathic formulations by SafeCareRx, created to complete the contemporary practice.
4. Professional, ongoing, consultation services to help you, every step of the way. Our offices are open every weekday, Monday through Friday from 8:00 a.m. until 5:00 p.m. Eastern time. Call toll-free: 866-298-2740.

C.H.E.S.S is a valuable resource that has proven to be a long-term practice builder built upon improved patient outcomes with safe and effective solutions.

The Challenge

As you consider C.H.E.S.S., remember this: We have been working directly with practitioners since 1989, and have many testimonials about the dynamic effectiveness of our natural homeopathic medicines.

C.H.E.S.S. is not about miraculous ways to choose magic bullets, expecting single remedies to clear every condition. Nor is it about dabbling with homeopathy. It is, instead, a comprehensive, proven resource that provides the 21st century doctor with a 21st century armamentarium. Use it with or without other therapies as you continue to bring forth the fullest expression of health in your patients.

We challenge you to thoroughly test these procedures and experience the healing revolution within your practice.
Homeopathy for Every Profession

Homeopathy can benefit every profession, specialty and style of practice. As you review the SafeCareRx medicines you will see how homeopathy bridges every realm of health care from emergency medicine to preventative care.

SafeCareRx formulas are designed to provide practitioners with safe and effective medicines to activate the body’s innate healing abilities. Whether you are working with chronic, recurring, or so-called incurable conditions, homeopathy is a natural approach that may correct underlying causes, and can help make you a better practitioner.

Homeopathy can be utilized in any healing profession:

- General practitioner
- Chiropractor
- Oncologist
- OB/GYN
- Psychologist/Psychiatrist
- Pediatrician
- Acupuncturist
- Naturopath
- Nutritionist
- Herbalist
- Body worker
- Veterinarian

Suppressive vs. Expressive Treatment

When symptoms are suppressed by conventional drug therapy, the body’s ability to heal is also suppressed. Certain strong drugs that overwhelm the body’s inherent tendency to heal can seriously weaken the immune system and other defense processes. A weakened system is more susceptible to serious physical and mental illness. As symptoms are suppressed, they are driven deeper into the mental, emotional, and physical levels. Because homeopathy is an expressive, rather than a suppressive therapy, underlying causes are corrected and symptoms clear. Homeopathy brings about balance on the mental, emotional, and physical levels.

Classical vs. Contemporary Homeopathy

Modern practitioners of homeopathy generally fall into one of two schools: classical or contemporary. Classical homeopathy is the original system founded 200 years ago and developed over the next 100 years. Procedures include compiling extensive, detailed notes on each case, then prescribing a single remedy in a single potency. That single remedy in the single potency dose is given, and then the patient waits to see if there are any results.

Alone, the classical approach has its limitations. One primary problem is the time involved in compiling a detailed case history. It often takes well over an hour to acquire necessary information to select an appropriate remedy. If either the remedy or the potency chosen are not the best choice for the body, nothing will happen. The symptoms may remain. From this point, it could take three or four remedy tries (each lasting
approximately one or two months) to find the correct remedy for a single aspect of a complex health profile. Patients may lose patience.

In contrast, the contemporary homeopathic approach includes using multiple remedies in multiple potencies in the same formula. In developing our evolutionary contemporary system, we have gleaned key aspects of the classical approach and combined them with modern techniques to achieve an effective, easy-to-use system. With contemporary homeopathy, the principles of classical homeopathy are implemented, but the speed of finding the right remedy is greatly enhanced. This maximizes the body’s potential to utilize exact, necessary remedies and potencies, relieving symptoms and restoring balance.

The Modern Disease Picture

With the advent of the Industrial Revolution, environmental toxicities, vaccinations, and suppressive drug therapies, the basic evolution of disease processes became more complicated. The disease patterns of today are much more complex than they were 100 to 200 years ago when classical homeopathic principles were developed. Since 1979, we have tested both the classical and contemporary approaches and correlated the results. During this time, our doctors and support staff have utilized these methods and correlated them with diagnostic backup, including X-ray, blood, urine and saliva laboratory workups, questionnaires, ECG, EEG, EMG, pulmonary function tests, and thermography. Our clinical experience indicates that a comprehensive approach to contemporary homeopathy yields greater results.

Homeopathy empowers the physician to correct interferences throughout the whole body. Like Homeopathy is a highly individualized healing art. Finding the corrections for the interferences is the key to its success. Any true cure requires the actual correction of the underlying cause. Though not always easy, it is well worth the results.

Homeopathy equips you to help the greatest number of people overcome the greatest diversity of problems. With its vast accumulation of clinical data, homeopathy empowers the physician to make the most significant healing impact on society. Our homeopathic procedural system has been worked and refined in practice over the past 25 years.

The doctors who are willing to rise up and work with these cases will be the ones who will reap the rewards. With our procedural system for homeopathy, you can do this without spending excess time with your patients. The key is to stay persistent when faced with a challenging case. The only ones who fail will be the ones who give up prematurely. Our procedure is like following the yellow brick road to health. Keep your mind open to all the possible underlying causes.

“Our revolutionary, contemporary homeopathic system equips you to help more people, more efficiently, than you ever thought possible.”
~ Dr. Frank King
Your Practice and C.H.E.S.S.

Do many of your patients have chronic or recurrent conditions that do not seem to change or show only short-term improvement? Every doctor has a few disappointed patients who gradually give up or suddenly disappear because permanent results are lacking. Often, patients don’t quit coming completely, but retain only a low-level commitment, which severely hinders their recovery. While you cannot cure everyone, you can dramatically increase both patient commitment and the number of permanent solutions when you are armed with C.H.E.S.S.

The Ideal Practice

What would be the ideal practice for a practitioner in today’s climate?

- An abundance of patients who travel long distances to see you
- Patients who seek your services and products regardless of insurance
- Liberation from managed care or the dependency on health insurance companies
- An excellent reputation for helping people
- Ability to help more people in fewer visits and less prescription medications.
- Ability to correct so-called chronic conditions

Disease continues to rob people of their quality and span of life. These people are seeking a doctor who is willing to step up to the plate and try to help them. You have the opportunity to provide your patient with solutions for optimal health. The proof of homeopathy is in the practice.

The founder of homeopathy, Samuel Hahnemann, frequently challenged his critics by saying, “Aude sapere!” which is Latin for “Dare to know!”

PHASE I
Personal Health Appraisal

PRACTITIONER CORE MODALITY

C.H.E.S.S. is built upon restoring the powers resident within every patient

Figure 1
PHASE I - Personal Health Appraisal (P.H.A.)

The Personal Health Appraisal (P.H.A.) is a strategically designed questionnaire to help you recognize, organize, and prioritize a symptomatic treatment protocol for correcting today’s more complex and elusive health problems.

All patients should fill out a P.H.A.

Properly completed, this form is a powerful resource. It will help you pinpoint the root cause(s) of your patient’s overall health condition. Empower your nurses and assistants to emphasize the importance of this questionnaire. If the patient had any resistance toward filling it out, they can explain that you are a stickler for every detail concerning the health of your patients and that you will not see them if this form is not accurately filled out. This stand can turn potentially difficult patients into committed patients. See figure 3

Clinical History: A Physician’s Most Important Tool

As you know, a clinical history is the physician’s most important tool. Medical literature indicates that 83 percent of all diagnoses can be made at the end of a consultation, provided the doctor asked the right questions. The P.H.A. equips you to ask the right questions, so you readily identify the underlying causes of disease.

The Key to Success: The Doctor/Patient Relationship

There is another distinct advantage to using the P.H.A.: it promotes clear, open communication between doctor and patient, which is vital for building a positive foundation. The initial consultation is the most critical time with the patient. Beyond your preliminary diagnosis, this first meeting establishes the patient’s acceptance of your recommendations and their compliance with your treatment.

The P.H.A. questionnaire is an important part of this initial contact, and, likewise, it represents your commitment to the patient. The P.H.A. helps patients believe that their individual needs are important to you, and also provides you with pertinent information, helping solve even the most challenging cases.

“We must see the whole person to help the whole person.”
~ Dr. Frank King

Figure 3: See Appendix for The Personal Health Appraisal (P.H.A.) Your patients can download this form at www.safecarerx.com and fill it out before their next visit.
The Multiple Advantages of the Health Appraisal:

1. **Prioritizes treatment with the P.H.A.** - The Personal Health Appraisal helps you identify problems that elude most doctors. It uses a grading system for symptoms, enabling you to prioritize treatment areas. Consider the high intensity issues first and follow up with less intense issues when re-evaluating the patient. This process can be likened to peeling an onion, starting with the outside layers (most acute) and then working your way toward the inner layers (more chronic).

2. **Patients become more aware of their current health status** - The P.H.A. begins with an open area for patients to list their primary condition(s). As you relate secondary concerns to primary ones, patients will better understand how the body is an integrated whole, and that it is essential to treat the whole person to truly build health to its highest level and prevent disease.

3. **Reveals the diversity and intensity of patients’ symptom patterns** - The P.H.A. is a tremendous timesaver because it provides a revealing look at the patient’s total health profile. As a health care practitioner, you know that without a meaningful overview, a maze of symptoms can be overwhelming, time consuming, and misleading.

4. **Provides a systematic, organized approach to correct challenging cases** - There are more challenging cases today than ever before. Many patients have tried other types of treatment and are dissatisfied. A common complaint is being mistreated, ignored, or being told, “it is all in your head.”

5. **Monitor patient health progress; honestly evaluate treatment success** - It is easy for practitioners to deceive themselves about their success with patients, especially when many diverse conditions exist. The P.H.A. clearly reveals what *has* and what *has not* been corrected. With C.H.E.S.S., patients definitely improve, and the P.H.A. helps you monitor their results.

**The Symptom Rating System**

The P.H.A. includes a (0-5) numbering system to rate symptom intensities:

- **0** - Never or No
- **1** - Very Mild or Occasional
- **2** - Mild
- **3** - Moderate
- **4** - Severe
- **5** - Very Severe or Yes

The higher scored symptoms represent the outer layer of a patient’s condition. The individual will respond best to those remedies that address the more severe symptoms.

There are several benefits to using this method:

**First**, a basic profile of symptom information is perceived at-a-glance. You can quickly prioritize which bodily system is most in need of repair. **This is usually a good indication of which category of SafeCareRx formulas to test.**

**Second**, the number system encourages patients to make basic choices about their health. Rating symptoms is a healthy way for patients to begin communicating with you and participate in their recovery. Let’s face it, without a system like this, symptom explanations can be time consuming and difficult to interpret. A rating system provides an efficient information base.

**Third**, the symptom rating system is a ready reference for follow-up visits. Particularly with chronic cases, it is difficult to keep track of complex symptom patterns. This is not only true for practitioners, but for patients. Reviewing numerical improvements enlightens both parties.
The Personal Health History (P.H.H.) worksheet is a progressive case history flow chart. It enables you to successfully manage today’s diverse health problems without sacrificing a high volume practice. Broadening the depth and scope of your practice does not require you to spend excessive time with each patient. See figure 4

There are four benefits to the P.H.H.:

1. Provides an organized framework for correcting difficult and elusive cases.
2. Minimizes time spent with patients and maximizes your ability to target the appropriate underlying causes.
3. Eliminates long discussions with patients.
4. Provides documentation of progress in the patient’s own handwriting, ensuring accurate communication and enhanced awareness.

The Symptomatic Recovery Matrix: “everything at a glance”

Designed to complement the Symptom Rating System (refer to Phase I), the Symptomatic Recovery Matrix is a simple chart within the P.H.H. that makes a broad-scoped practice flow more efficiently.

The symptoms and corresponding intensity numbers can be initially transferred from the P.H.A. to the P.H.H. either by you or your staff assistant. After the first visit, however, your staff assistant should have the patient score the matrix before every appointment. Then, to get an accurate patient profile, simply glance over the current symptom intensity numbers. In just a few seconds you can identify the key issues.

Procedures for using the Symptomatic Recovery Matrix:

Initial consultation:

- Transfer up to 12 of the patient’s symptoms from the Personal Health Appraisal (P.H.A.) in the space provided on the P.H.H. (one symptom per line). You can either transfer the symptoms or circle them on the P.H.A. and have your staff assistant transfer them.

- Assign a number for intensity of each symptom (0-5).
- Fill in the date at the bottom of the grid.

1. The first time, have your staff assistant review the matrix system with the patient. (Remember the patient is already familiar with the numbering scale from filling out the P.H.A.) Have your staff assistant note any new conditions or injuries.

2. Have the patient enter the symptom intensity numbers and the date.

3. Have your staff assistant return the form to the patient’s file so it is ready for you. Before entering the room, you can observe at-a-glance any changes that occurred since the first visit up to the present time. See figure 5

Although the Symptomatic Recovery Matrix is a unique aspect of the P.H.H., it contains a number of other valuable tools.

- At-a-glance referencing of patient’s personal information.

- Pictorial area to mark problem areas and treatment procedures. For the chiropractor, The spinal grid allows you to mark specific listings.

- Space to record notes, homeopathic and/or dietary formulas and testing information.

- A Visits/Tests/RS section for “rescheduling” follow-up lab tests like blood or urine work.

PHASE III - Choosing Appropriate Formulas

How to choose the right formulas and use them properly

C.H.E.S.S. is designed to help you correct the underlying causes of complex health problems with easy-to-apply procedures. Make sure you are familiar with the SafeCareRx formulas as well as the conditions they address (see the Product Descriptions). You need a basic understanding of each product to use the system properly.

**Condition-Specific Approach**

Choosing the correct formula(s) for each patient is easy. The formulas are named for the conditions they address. The labels also indicate detailed symptom patterns that apply to each formula.

Where several formulas seem applicable to the same condition (such as a headache), check the symptomatic patterns or conditions listed on the label (or see the Product Descriptions or Repertory) and choose the formula that most accurately describes the patient’s condition.

**Multiple Conditions**

Patients may present several conditions simultaneously. For example, a patient complaining of fatigue and back pain could probably use two formulas specific to back or muscle pain, as well as other related formulas.

However, in cases where patients present a complex array of symptoms and conditions, we recommend choosing no more than 3 or 4 formulas at a time. In complex cases, you are peeling back many layers of disease. It is logical and most effective to move forward a bit at a time.

It is common to observe that seemingly unrelated symptoms clear up with the appropriate homeopathic formula(s). Once the formula(s) that addresses the highest scored condition(s) has reached maximum effect, you may begin searching for formulas related to the next highest scored symptoms (on the P.H.A. or P.H.H.) if any remain. Continue these procedures until you have put all the pieces of health back together again.

**Dosage Instructions**

**Read this section closely.** Proper dosing is easy with C.H.E.S.S., but complete understanding may take careful study and practical experience. Dosage and directions are clearly indicated on the label of each container. The dose should be sprayed into the mouth and swallowed.

For best results, doses should be taken between meals or at least 10+ minutes before or after a meal. Allow a minimum of 10 minutes or more between doses of different formulas to ensure that each formula works fully within the body before the next one is introduced.

With SafeCareRx formulas, it is the frequency of the dosage that makes the therapeutic difference. The amount a patient takes in the dose is not as important as the dosage frequency – taking larger doses (more than 3 sprays at a time) will not increase the effect.

**Determining the Dosage Frequency**

Historically, it has been a time-consuming procedure to determine the appropriate homeopathic remedy, calculate which potency to give, and decide the frequency of the dose. Recent advances, however, have produced a more practical and simpler version of this process. This simplified approach is the cornerstone technology of C.H.E.S.S.
Standard Dosage & Duration Per 2 oz. Bottle

Standard maintenance dosages:
- Adults (13 & over) - 3 complete pump sprays, 3 times per day
- Children (2-12 yrs.) - 2 complete pump sprays, 3 times per day
- Newborns (up to 2 years) - 1 complete pump spray, 3 times per day
- Adults using an 180ul (0.18ml) sprayer, one full spray is approximately equal to 3 drops.
- A 2 ounce bottle containing 60ml of product will provide approximately 333 full sprays, or 999 drops.
- 333 sprays @ 3 sprays (adult dosage) 3 times a day = 37 day supply.

Some General Rules About Dosing

The #1 priority for the great successes in homeopathy is finding the proper homeopathic formula(s). The second priority is the frequency of the dose. This makes the therapeutic difference, rather than how much is taken in each dose.

See the Dose Usage Chart on page 22 of this manual.

1. Dosage frequency is generally determined by the acuteness or chronic nature of the condition.
2. The more acute the symptoms, the more frequent the dose. In acute cases, formulas are usually required for a comparatively short period (days).
3. The less acute (more chronic) the symptoms, the less frequent the dose. In chronic cases, formulas are usually required at a standard dose for a longer period (weeks, months).
4. As symptoms clear, slowly decrease the dosage frequency until the desired results are attained.
5. In acute cases, the decrease of symptoms corresponds to the dose reduction. In other words, as symptoms decrease by about 50 percent, decrease the dosage frequency by 50 percent; as symptoms decrease 80 percent, decrease the dosage frequency 80 percent from the original dose, etc.
6. The most common doses starting out are 3 complete pump sprays 4-6 times per day.
7. Tell patients they should not stop taking the formula until you tell them, even if the condition seems to be gone. The elimination of symptoms does not necessarily indicate the formula has produced its total corrective abilities on the individual. (See Retesting Procedures)
8. There is no need to have patients disturb their sleep pattern to take doses. Recommend they keep the formula(s) close at hand. If waking occurs, they can take a dose: otherwise, let them sleep.

Acute Symptom Patterns and Dosage Frequency

Acute symptoms are usually clear-cut and short-lived. An acute disease pattern is a sudden, strong reaction of a healthy vital person to the effects of virus, bacteria, toxins of different origins (endogenous as well as exogenous) or the malfunction of one or more body systems or organs (e.g., indigestion, liver congestion, etc). They often represent short-term efforts of the body to deal with stress, infection, or injury in order to re-establish good health. Some common reactions may be strong, such as fever, nausea, sweating, cramps, pain, panic, and headache. In an acute situation, it is possible both fear and fever may also rise. Some other examples of conditions that require crisis doses are migraines, allergic reactions, asthma attacks, major PMS or menstrual cramps, emotional traumas, anxiety attacks, motion sickness, or the onset of a cold or the flu. A crisis demands immediate, focused attention. In a crisis situation, such as a severe musculoskeletal injury, the Back, Neck, Muscle & Joint Injuries can be taken every hour or every ten minutes.
Choosing the appropriate dosage frequency in an acute case (4-8 times daily to every ten minutes for the first hour) depends upon the degree of symptom acuteness. Based on your experience, determine how acute the patient’s symptoms are and select a corresponding dosage:

- Mildly acute – 4 times daily
- Moderately acute – 8 times daily
- Highly acute – every hour
- Extremely acute – every ten minutes for the first hour

Remember, a patient could drink a whole bottle of SafeCareRx formula without negative side effects, so you need not worry about toxic side effects. The important thing is to establish a consistent dose until results appear, varying the dose only if necessary. If the patient reports no results, gradually increase the dosage frequency until symptoms begin to clear. Once symptoms start to clear, reduce the dosage frequency accordingly.

Symptom Characteristics of Chronic Conditions

Sometimes, the word “chronic” is misinterpreted to mean “less serious.” But when acute conditions come and go unchecked, chronic conditions don’t leave so easily. They often cause a gradual decline into poor health. In some cases, they even cause death. A chronic condition often begins as an acute one. When battling the underlying causes of an acute condition, sometimes the body alone is incapable of fully restoring itself. As the organism struggles to recover, energy is drained. The resulting degeneration of the parts affected by the disease may eventually lead to a chronic condition which weakens the immune system and impairs quality of life.

Example of an adult patient dosing with a chronic condition:

Note: One adult dose is 3 full pump sprays.

- 6 doses a day for 3 days
- 2 doses a day for 7 days
- 1 dose a day for 2 weeks
- 1 dose 3 times a week for 2 more weeks

***Note: Toxicity levels in these patients are often dangerously high. A good place to start is helping the body rid itself of accumulated toxins by recommending SafeCareRx detoxification formulas.

As you consider symptom patterns, remember to search for root causes. Sometimes formula labels seem to match symptoms exactly, yet using the formula doesn’t change the condition. This is where the Reflex Response Test or Muscle Testing Procedure is indispensable. Confirming that patients are responding to a given formula indicates that they should keep taking it whether or not they have already seen improvement.

For example, consider a patient with a sore throat, cough, and sneezing. If symptoms are the only basis for judgment, one could easily choose the Colds & Flu formula when, in fact, the Allergy/Hay Fever Reliever formula would produce better results. The Reflex Response Test leads you to exactly the right formulas and doses.

The health practitioner that develops a persistent, detective mentality to discern and discover the missing pieces of each patient’s personal puzzle, will be the doctor that experiences the greatest success with homeopathy.

Testing

Upon completion of Phase I and II, you will have noted which formulas may apply to the patient’s condition(s). (Remember, you can refer to the Repertory Section of the Physician’s Quick Reference Manual and the Mind & Body chapter to help choose the priority of formulas to test.) Beyond choosing formulas with
the condition-specific approach, we recommend using a testing procedure to confirm which formulas your patient responds to.

Alternative Testing Methods

Muscle Testing

Muscle testing is based on the concept that your body intuitively knows – better than your conscious mind – what therapies, substances, lifestyle choices or ideas are most beneficial for your health. The basic theory is that your body exhibits a measurable muscle weakness when its bioenergetic field intersects with something dysfunctional or imbalanced. More than 100 research studies have shown muscle testing to be a clinically useful tool (Cuthbert 4).

All living and many non-living things emanate energy fields that can be visualized using Kirlian photographic techniques. These energetic fields interact and communicate with each other in complex ways. This interaction can be compared to the wireless communications we use today. See figure 6

Alternative testing methods rely on these energetic forces, specifically in how the energy fields emanating from a person and a homeopathic remedy interact. We use these methods to test various remedies to determine what a patient needs.

Two effective ways to confirm a patient’s needs include the Muscle Test and the Leg Length Check. They may be used individually or together as double confirmation. We strongly recommend you use the procedure that works best for you. Most doctors develop a general preference and use either the Leg Length Check or the Muscle Test Procedure, depending on the patient. If the patient is a younger child or elderly person, the Leg Length Check generally functions best.

To better understand how this pathway is tested, consider the following examples. A light bulb is hooked up to a battery in an open circuit. As different materials are placed on the bridge, thus closing the circuit, there are different outcomes. One substance causes the bulb to barely flicker. Another causes a bright light. Another has no effect.

This is similar to the body’s bioelectrical feedback system. Holding a bottle of SafeCareRx homeopathic formula tests the body’s response to that formula, as if closing the circuit.

- A positive response (meaning the body needs that formula) will cause muscle strength and a negative response will cause muscle weakness.

- A positive response will cause a short leg to temporarily become even or reverse, or cause even legs to temporarily become uneven.

The Sublingual Reflex Response Test is an alternate method where the doctor sprays a small dose of product in the patient’s mouth while muscle testing. The sublingual (under the tongue) branch of the mandibular nerve is directly connected to the brain. The brain allocates more area to the sublingual nerve pathways than to any other part of the body. This nerve pathway sends messages to the brain and back to the body at an average speed of 200 miles per hour. Because of this, the sublingual nerve pathway produces an accurate response within seconds.

The following procedural guidelines relate to the testing of the pectoralis major clavicles and the anterior deltoid muscle groups only. We have found this test to be the most efficient and accurate way of confirming formulas. However, depending on your style and experience, you may want to use the leg length check (or the
DNFT, activator technique or Toftness instrument) or test an alternative muscle group, such as the one associated with the problem area.

The Advantages of Muscle Testing

1. Each individual muscle test takes about ten seconds to confirm the appropriate formula. The entire process may take less than five minutes.
2. No training seminars are necessary to use this method.
3. No expensive diagnostic equipment is required. All you need is the formula to test with your patient. (Test kits are available through customer service.)

Muscle Test Procedure

Once you are comfortable with the muscle testing method, take as much time as necessary to carefully explain the procedure to your patients and help them feel comfortable. Explain that their body has a way of communicating its needs and confirming which formulas it needs. What you are testing is completely natural and has no side effects or reactions with other drugs. Explaining your testing procedures helps develop a positive relationship, increases patient comfort and builds patient confidence in you.

The actual testing takes only a few seconds per formula.

1. With your patient supine, ask whether he/she has any problems with degeneration or inflammation of the shoulder or arm. If there is a problem, test the other arm or use the Leg Length Check. See figure 8

2. Instruct the patient to extend the arm straight up to the ceiling (90 degrees) and lock the elbow straight. See figure 7

3. Stand alongside the patient and attempt to pull the arm down and slightly away from the body while the patient resists the movement. Test two or three times to find baseline strength. If the muscle is never strong, use the Leg Length Check or see notes about a weak muscle baseline below. **You are trying to determine the condition of the patient’s muscle response, not overpower it. Do not attempt to push the patient’s arm all the way down.**

4. **Ask patient to hold a bottle from the test kit.** Alternately you may spray the remedy under the patient’s tongue, if you have spray bottles of the remedy available.

5. **Gently, but firmly, pull the patient’s arm in a downward motion, using the same force as on your baseline test.** If the muscle weakens, the formula is not appropriate for the patient’s needs. If the muscle is strong, the formula is appropriate. Make sure the patient does not bend the elbow or use other muscle groups that may skew the test results.

6. **If you would like to continue testing other formulas, wait a few seconds and have the patient swallow 5-6 times.** The patient may drink some water to speed the process.

If you are unable to establish a strong baseline for the patient (if the muscle always goes weak when the patient is not holding a formula), try having the patient hold a homeopathic formula while Muscle Testing. If the patient’s arm becomes strong, this is a positive result. It indicates that the remedy is therapeutic and appropriate for the patient.

Testing for Multiple Formulas
Providing one formula that tests positive per patient is ideal, but rarely practical. Most conditions commonly require the use of more than one formula. We suggest not giving the patient more than four formulas at a time. As you retest in subsequent days or weeks, you will find that some of the short-term formulas are no longer needed. At this point, you may introduce new formulas until you reach optimal health with your patient.

If you identify four formulas that test positive:

1. Have the patient hold all four formulas against their body and retest. If they all test positive, then all four formulas are appropriate.
2. If they don’t test positive, eliminate one formula at a time until you find what formulas work together. Some formulas may have an antidoting effect with other formulas. Make notes and provide only the formulas that test positive together.
3. Later on, as the given formulas do not test positive, you can retest the formulas that were antidoting. Over time, you will be using all the formulas needed to maximize your patient’s health.

Don’t feel rushed to fix everything at once. The body, in its innate wisdom, will strategically choose what it needs at the time to efficiently restore health.

**Formula Names Are Not Always Diagnostic**

Because the formulas are named for the conditions they are designed to correct, either the patient or the doctor may believe he or she is dealing with that problem when the formula tests positive.

This is a good time to remember you are dealing with people, not diseases. You might have the PMS Relief test positive on a man or the Cold Sores & Herpes Reliever test positive for a bad case of poison ivy. Remember, SafeCareRx homeopathic products have a broad-spectrum effect on the whole body (mentally, emotionally and physically).

Homeopathy alone is a powerful healing system. When combined with other procedures, the resulting transformation often produces a powerful testimony.

**Leg Length Check**

You may use a Leg Length Check either as an alternative to, or in conjunction with, the Muscle Test Procedure. It takes only a few seconds to confirm a positive response and can be used with equal effectiveness either before or after the adjustment. Children under the age of seven are difficult to muscle test. The Leg Length Check often works better with these younger children. Here is the procedure and some suggestions for developing a positive patient relationship. With the patient supine:

1) Check the leg lengths, noting whether the legs are even or uneven. When even, always note the short leg for an even leg test consistency. Later, when you have a positive response, with a shift in leg length, have your patient sit up and observe the dramatic shift in leg length.

2) Have the patient hold a formula from the test kit. In approximately five to seven seconds, you will observe a dramatic shift in leg length if your body is responding to a formula.

3) After five to seven seconds, recheck the leg lengths: If the leg
length changes in any way — either becomes longer, shorter or even — a healing response has been activated and reflects that person’s need for the remedy. No change in leg length indicates a neutral response, showing that the remedy is not needed. Patients taking certain medications or those with low thyroid or high stress levels may take 10–30 seconds or longer to respond.

4) If a formula tests positive and you would like to continue testing other formulas, wait a few seconds and repeat procedure for single or multiple formulas. Leg length should return to the way it was before the formula tested positive.

5) Recheck leg lengths and make sure they have returned to the previous position. For example, if the legs were initially uneven and became even as the formula tested positive, make sure they become uneven again before testing other formulas. The patient may drink some water to speed the process.

Electrodermal Responses

Doctors can also utilize an electrodermal diagnostic device called a Zyto scanner to measure the galvanic skin response. This technique is useful to determine patients’ electrodermal responses to specific homeopathic formulas. This procedure is similar to the muscle test explained above: the patient holds the formula while monitoring the electrodermal response.

Surrogate Testing

The surrogate procedure enables you to test others who are unable to be accurately tested through the muscle and/or leg length procedures. Included in this group are infants, young children under approximately 7 years old and quadriplegics. Surrogate testing also works well for animals. See figure 10

For example, an infant can be tested sitting on the mother’s lap or belly. As long as the two living entities are touching, bioelectric impulses will transmit between the two. Let’s say an infant is suffering from a fever. After assessing the parent’s arm strength and/or leg length, place a small amount — one drop or pump spray — of fever formula in the infant’s mouth or simply have the parent hold the bottle to the infant’s body. In five to
seven seconds, check the parent for a response. Any changes, of course, indicate the infant’s need for that remedy.

Test Control Worksheet (T.C.W.)

The Test Control Worksheet (T.C.W.) is a useful form to record Reflex Response Test results. It enables you to observe at a glance any patient’s entire test history. The T.C.W. is designed to:

1. Provide an efficient record of formulas previously tested. This prevents wasted time retesting the same formulas that have already tested negative.

2. Provide a quick reference that will help you choose follow-up formulas to consider when putting together the pieces of a patient’s health puzzle.

3. Keep track of when a formula was given and when a formula was stopped.

4. Quickly reference whether the patient has a strong or weak indicator muscle. Explain the difference between a weak indicator muscle becoming strong on one visit and a strong muscle becoming weak on a follow-up visit, as it is only a reflex response like a knee-jerk response. This dispels questions about why a strong muscle goes weak. It does not indicate that a homeopathic formula is making them weak. Remember, this is unique to properly formulated homeopathic products only. **Nutritional and herbal products do not test in this manner.** Only
homeopathic products will cause a strong indicator muscle to go weak to indicate the body’s positive response to a formula.

5. Give a quick reference for dosages and when to change dosage.

6. Provide a place to note key points.

7. Provide room for notation about whether the patient’s muscle and joint area relating to the test muscle (for muscle test only) is healthy and free of disease.

8. Provide an area for special comments.

Retesting to Produce Optimal Results

Whether you are using the alternative testing procedures such as muscle testing, electrodermal testing or the like, there is a distinct advantage in retesting - it allows you to capitalize on the body’s wisdom. Beyond simply confirming the correct formula, testing and retesting with alternative procedures helps you determine dosage frequency, and when to stop and/or restart a formula without repeating lab tests throughout your course of treatment.

Retesting is quick and accurate and may occur at your discretion during regular appointments. Anytime a patient comes in, you can get direct feedback about current formula requirements. This gives you a powerful advantage in your community for cracking the challenging cases that others have failed to correct.

Retesting Procedure:
For precise retesting, instruct patients not to take any formulas the day of their appointment.

1. Test the formula(s) the patient is currently using with the reflex response test (using leg check, muscle test, or both). Formulas that retest negative: slightly decrease the dose frequency. If the patient continues to test negative on a formula during several subsequent visits, stop using the product and retest after several weeks. Formulas that retest positive: keep increasing the dose frequency.

2. Unless the condition is completely resolved, choose other formulas to test based on the patient’s condition, the Personal Health History worksheet (P.H.H.), the Personal Health Appraisal (P.H.A.), the lists of complementary formulas and the repertory (see Physician’s Reference and the Mind & Body Reference sections). Sometimes the patient will have a request for a formula to be tested.

3. Test the formulas you have selected. If any test positive, proceed according to original dosage instructions. Remember to work gradually, not giving out a total of more than 4 formulas at one time.

Simplicity + Effectiveness = Optimal Results

We have spent many years of clinical research to simplify and increase the results you can achieve with homeopathy. Follow the procedures we have outlined in the C.H.E.S.S.™ and you will avoid getting bogged down in the homeopathic complexities of the past. These procedures and SafeCare Homeopathics, combined with your skills as a physician, will lead you to effectively correct the underlying causes of many of the health problems plaguing our society.
The Healing Crisis

Occasionally, a patient who seems to be successfully receiving homeopathic treatment will experience a temporary worsening of symptoms. This is known as a healing crisis or temporary aggravation. In a healing crisis, symptoms can appear to worsen, or past symptoms may reappear. This may occur within a few days to a few weeks of beginning a new formula. Although it is very rare, you will need to know how to handle these cases.

A healing crisis usually occurs as the body is clearing symptoms that have been suppressed. It is important for your patient to understand that this temporary aggravation of symptoms is positive – a good sign that his or her body is fighting back and healing is underway.

Hypersensitivity

Some people have immune systems that are hypersensitive to remedies of any kind. Homeopathic formulas may produce a reaction in hypersensitive people similar to a healing crisis. In other words, the formula will need to be diluted to prevent reactions in these patients. Once again, you will want to reassure your patients that this is nothing serious. When working with patients who are hypersensitive, use the following procedure:

- Place one to three pump sprays of the formula into approximately 4 ounces of water (use distilled or purified water if possible).
- Stir with clean utensil.
- Give 1 teaspoon to patient as needed.
- A more sensitive patient may need to take very little per day. In this case, they can dip the tip of a toothpick in the water and place the toothpick into their mouth.
- A new solution in fresh water should be prepared every time a dose is needed to avoid contamination or anti-doting.
- Have patient simply spray on localized or symptomatic areas topically.

Average Number of SafeCareRx Formulas Used In a Year

To maximize the therapeutic potential for your patient, the average practitioner will use 5 to 15 different formulas (depending on the overall acuteness or chronic nature of the patient) in one year of treatment.

Most formulas will complete their correction with one bottle. There are times when a key formula will be necessary on and off over time, requiring more than one bottle for maximum correction. This might be a constitutional formula, miasm formula, detoxification formula or simply a symptom-specific formula that contains a deep acting ingredient that is special for an individual patient.

Case Study

Rheumatoid arthritis is a good example of a condition that may require varying doses and formulas. This condition expresses both chronic and acute symptoms.

Here is a sample case and how to approach it:

- A 42-year-old female patient with rheumatoid arthritis comes into your office complaining of an acute arthritic pain. You have just begun using C.H.E.S.S., so your staff assistant has the patient fill out a
Patient Health Appraisal (P.H.A.) and you test the new patient on the Arthritis & Joint Relief formula and find she needs it.

- Three days later, she returns with some pain but reports feeling about 25 percent better. Retest the Arthritis & Joint Relief formula. It tests positive again. Accordingly, when a formula keeps testing positive, you increase the frequency of dosage to 8x/day.

- One week after the first appointment, she returns, feeling 50 percent better. You retest the Arthritis & Joint Relief formula. It tests negative. You decrease the dosage to 4x/day.

- A week later, she returns feeling almost completely well (95% better). You test her, and again the formula tests negative. You reduce the dosage to 2x/day.

- Four days later, she returns feeling great. You test her and the formula shows negative. You put her on a maintenance dose of 1x/day. Since the primary condition (arthritis) is stable, you begin to direct your attention to other conditions she mentioned on her P.H.A.

- Using the same approach, over the next month you also correct the underlying causes of her overactive appetite with the Appetite & Weight with P.H.A.T. formula, and her sleeping disorder with the Sleep Aid formula.

Note: A more complex rheumatoid case will require multiple formulas to address the various underlying causes that may be associated.

**PHASE IV – Solving Difficult Cases**

Although using C.H.E.S.S. is easy, you cannot realistically expect to hit the ball out of the park on the first swing. Some cases require patience, creativity, and ingenuity. The most important characteristic for optimal success with homeopathy is persistence because there are many discouraged people who have not yet found the answers they need. With C.H.E.S.S., you are now dynamically equipped with the tools to help these people.
What to do when what you’re doing isn’t working.

Problem: When tested, the patient doesn’t respond to any formula.
Answer: Possibly the patient’s reaction time is being delayed.

Sometimes, rather than responding in 5-7 seconds, the body will take upwards of 20-30 seconds. There are several possible causes for this delay:

1. **Dehydration:** This can cause imbalance in the body’s electrical system. This can be corrected by having your patient drink more water.
2. **Drugs:** Many prescription drugs can cause a delayed reaction.
3. **Thyroid conditions:** A low functioning thyroid gland can cause a delayed reaction. If a patient doesn’t seem to be responding to any formula, re-administer the formulas that best match the primary condition(s) and wait 20-30 seconds before muscle testing or leg length checking.

Problem: Patient tests positively to a formula but condition does not improve.
Answer: Get the total picture.

1. **Test complementary formulas, which are listed.** These are listed for every formula along with indications for use and ingredients in the Product Listings and the Mind & Body sections.
2. **Use the Repertory.** This shows the priority order of SafeCareRx formulas to test for particular conditions.
3. **Consider related conditions or symptoms.** Stimulating the body’s maximum healing response can require consistent use of several formulas at once that have related symptoms. As you put the pieces of health back together in difficult cases, test a few new formulas each visit in search of other positive formulas for the non-responding patient. Try giving different combinations of confirmed formulas for one to two weeks at a time. Also, provide or recommend other services, such as diet, nutrition, herbs, or other techniques, such as: chiropractic, acupuncture, or massage.
4. **Do not jump to conclusions simply by reading the name of a formula which tests positive.** The most therapeutic combination of formulas may not be the most obvious. Because a patient tests positive does not confirm that he or she has that condition. The person may be responding positively to one or more of the ingredients in the remedy. This means the body requires at least one of the ingredients in the formula, but the patient does not necessarily have the condition that appears on the label.

**Minor Remedies for Major Problems**

Homeopathy can have seemingly minor remedies that, when combined, can offer the solution to major problems. With more than a thousand individual homeopathic remedies available to practitioners, choosing the right remedies for a condition can be daunting.

Let’s look at how SafeCareRx formulas can help us solve more difficult cases. In a chronic back pain case, we would first consider the more common remedies such as Back, Neck, Muscle & Joint Injuries, or Arthritis & Joint Relief. If one or two of these had tested positive, but only showed minor results, we would look further. For example, we would further test using the following:

- **Muscle Maximizer™** – for hormonal weakness, and muscle weakness.
- **Sporting Edge®** – for general weakness in the structural support tissues.
- **SciatiPlex™** – for sciatic nerve involvement.
- **Calcium Metabolizer™** – for complete calcium utilization.
- **Bone Strengthener™** – for strengthening the bones and mineral balance.
- **ICV Clenz™** – for the ileocecal valve and its related problems with the back.
- **Stress Control™** – for stress issues affecting the muscles.
- **Fears & Phobias™** – for fear issues affecting the body’s mineral balance.
- **Acid Clenz™** – for related acid conditions, affecting calcium absorption.
- **Wounds Recovery™** – for injuries affecting the back.
Constitutional Enhancer™ – for overall health enhancement.

Constipation Relief™ – for bowel issues affecting the back.

Urinary Tract Infections™ – for related pain affecting the back.

TMJ/Jaw Formula™ – for related pain issues, affecting mineral balance and muscle tension.

LymePlex™ – for related issues, affecting aching or stiffness of joints or muscles.

Female reproductive remedies.

Male reproductive remedies.

All the detoxification remedies.

Remember that the names of the SafeCareRx formulas should not be used as the ultimate diagnostic tool. For example, a patient using the Wart Freee...™ formula may find that it clears an allergy or sinus condition that began about the time the warts appeared. Likewise, a patient using the Allergy/Hay Fever Reliever™ may find warts clearing. This is because homeopathy targets underlying causes, and underlying causes are often deceptive.

If the symptoms persist, there are more remedies to find. Persistence is the essential component. See the chapter about miasms in the Constitution category section for more help with difficult cases.

Setting Up Your Treatment Room for SafeCareRx Test Kits

The King Bio C.H.E.S.S. is designed to work quickly, powerfully, and economically. For best results, set up your treatment room so the whole test kit is visible and within easy reach. This will:

- Make formula selection easy.
- Minimize time spent with patients.
- Stimulate patients to ask questions and volunteer information about other conditions they may have.
- Increase referrals. Patients see all the formulas, and refer friends and family or purchase formulas for them.

Inventory Control Form

This form helps you systematically organize orders according to the specific demands of your practice. After using the system only a short time, you will see that some formulas should be more heavily stocked than others. (Best sellers vary in relation to your style of practice, types of patients, personal interests, and seasons such as Allergy/Hay Fever Reliever.)

Special Note: Refer to your Personal Health Appraisals (P.H.A) before ordering to be sure you have ordered what your patients need. For example, ordinarily you would assume that one or two Gout Symptom Relief would be plenty. However, when you use the P.H.A., you may find that many more patients than you thought have gout, hemorrhoids, herpes, bladder incontinence, and other diverse conditions. In fact patients will be very interested in many of the formulas as soon as they are aware you have them.

Inventory and Reordering Instructions:

1) Number how many bottles of each formula you would like to keep on hand in the stock column of the Inventory Control Form.
2) When your staff assistant checks inventory, he or she should simply note the difference between how many bottles you currently have and the stock number. Enter that under the corresponding reorder date for each formula.

3) Should you find yourself out of certain products, either increase the stock number or decrease the time between reorders.

The Inventory Control Form saves so much time and effort. Using it is a vital part of integrating C.H.E.S.S. smoothly. Feel free to photocopy it or ask us for the PDF file.

**The Patient Brochure**

Be sure to stock the various SafeCareRx patient brochures. This is a simple way to educate patients about homeopathy and which conditions you can help.

The patient brochures also list the entire SafeCareRx and Mind & Body product lines. As patients experience the revolutionary results of C.H.E.S.S. and become more aware of the products, they will refer relatives and friends for all the conditions listed in the brochure. These brochures, along with the P.H.A. and Personal Health History (P.H.H.), will build your reputation and practice dramatically.

Testimonials

“Several months ago, you sent a sample of Sinus Relief to the practitioner I am employed by. He began to experience results within a few days. I had stopped taking hormone replacement therapy (HRT) several months earlier and was experiencing terrible night sweats and hot flashes. I tried black cohosh, ESTROVAN, and other OTC products without success. My quality of life was deteriorating, as I was terribly sleep deprived and I was just about ready to refill my HRT prescriptions and take my chances with the possible side effects. Then my boss recommended that I try your Menopause formula. The big seller for me was that it had no side effects. I ordered it, and within 4-5 days, my symptoms had subsided 50% and, after about a week, I was sleeping through the night. No night sweats, no opening and closing the windows at work all day. It’s incredible! I don’t know how it works and quite honestly don’t care, all I know is that it does. I have recommended it to many friends who are experiencing the same relief. My co-worker who has struggled with insomnia for quite some time is experiencing great relief using the Anxiety/Nervousness formula in conjunction with the Sleep Aid. She is also amazed at the results. We are so grateful for your products.” ~ M.G.D. - Milton, NY

“I began using your homeopathic remedies in my practice about two and a half years ago because I wanted more for my patients. I used no therapies or any other types of modalities in my office, but I had a growing concern that I wasn’t providing all I could for my patients…. Having what I considered sort of a ‘purist’ chiropractic philosophy and no experience with homeopathy, I started very slowly and tentatively. I quickly found the C.H.E.S.S. approach to be so user-friendly and effective that it became a large part of my practice. I now test every patient on SafeCareRx products and sell many formulas every day to my pre-existing patients.” ~ Michael S. Wetter, DC (Florida)

“The Teeth & Gums Formula worked well on a tooth that my dentist confirmed was in need of a root canal. After taking the formula for several days, the jaw, cheek, and headache pain were gone.” ~ Sally Farney Lett, DC

“I use the formulas on my entire family.” ~ Fred J. Lewin, DC (Georgia)

“I had a patient with myofascial trigger points…causing referral pain in both legs. She was only able to use a walker for ambulation. I began a regimen of Back, Neck, Muscle & Joint Injuries four to six times per day. Within two and a half weeks, the patient reported she was getting ovulation pain again! Her M.S. pain, coincidentally, began at this time…With the recurrence of her ovulation, the trigger points began to remain inactive.” ~ Edgar P. Romero, DC (Florida)

“Besides the usual musculoskeletal cases, I have people coming in with earaches, sore throats, rashes, constipation, memory loss, hay fever, hypertension, and the list goes on…This type of practice is much more rewarding than just neck and back pain. . . Without this type of help, all I would be giving the patients is partial, temporary relief.” ~ Jan Edward Morse, DC (California)

“If I was not an actress, I would be a homeopathic doctor.” ~ Lindsay Wagner
F.A.Q.s About SafeCareRx Formulas

Why do all the remedies taste the same?
Our formulas are scientific serial dilutions and succussions of specific ingredients creating a potentization process of the finest natural ingredients in a base of bioenergetically enhanced pure water. Although our formulas taste similar, they have diverse effects. Patients prefer a taste-free remedy.

Are homeopathic remedies safe for pregnant or nursing women?
Yes. The safety of homeopathic medicines makes them ideal during pregnancy, labor, and nursing. Homeopathic remedies strengthen a woman physically as well as psychologically and are very effective in supporting common pregnancy conditions. Additionally, many homeopaths believe that homeopathic care during pregnancy is beneficial to the unborn child; two people (mother and child) receive treatment at the same time.

Is homeopathy the same as herbal medicine?
No. While they may use some of the same ingredients, there is a distinct difference between homeopathic and herbal preparations. The healing properties of herbal medicines are found in their chemical composition and how this acts on the body’s biochemistry. But as an energy medicine, homeopathy acts primarily upon the nervous system to activate the body’s innate healing responses. Homeopathy is bioenergetic medicine.

Why do SafeCareRx formulas have multiple potencies?
The multiple potency approach is one of the keys to the unique effectiveness of SafeCareRx formulas. Each homeopathic potency is like a different broadcast frequency which can only broadcast at its own potency rate. In every dose of SafeCareRx, you receive equal volumes of seven, high-potency, broad-spectrum potencies (or strengths) of each ingredient: 10X, 30X, 100X, 1M, LM1, LM2, and LM3. In general, the lower 10X potency works at the more superficial levels of bodily function, such as skin and hair health. The middle potencies 30X and 100X work more in the realm of our glands and organs. The mental and emotional functions (and even our genetic predispositions) are best enhanced with the higher 1M, LM1, LM2, and LM3 potencies. These potency ranges have been clinically proven to provide a higher percentage of results, faster results, and a higher percentage of actual cures with minimal aggravations or healing crises.

Will homeopathic remedies react negatively with prescription or over-the-counter (OTC) drugs?
No. SafeCareRx homeopathic formulas complement herbs, nutritional products, or prescription medicines as needed. In more than 200 years of clinical use, no harmful side effects or recalls for harm done have been reported for homeopathic remedies when prepared according to HPUS standards, as SafeCareRx is. There have been no harmful reactions reported between homeopathic medicines and other conventional pharmaceutical drugs. Homeopathy has a stellar record of safety when compared to most forms of medicine.

About Dr. King & King Bio®

Dr. Frank King is the founder and president of King Bio® in Asheville, North Carolina. King Bio® is an FDA-registered pharmaceutical manufacturing company dedicated to research, development, and education of safe, natural, homeopathic medicines. Dr. King is also a member of the prestigious Homeopathic Pharmacopoeia Convention of the United States HPCUS. The HPCUS works directly with the FDA as a governing authority of homeopathy in the United States.

Dr. King is a nationally recognized researcher, lecturer, and author in homeopathy. His passion to develop an innovative, highly efficient, and safe, natural medicine protocol launched him immediately into research following the establishment of his chiropractic practice. And for over two decades, he and his colleagues have researched to discover the most successful natural medicines and their procedures. Dr. King has developed over 500 natural homeopathic medicines along with new procedures to empower both the physician and consumer in their quest for optimal health.

As a contributing editor to many professional journals, Dr. King's articles have been published in The American Chiropractor, Chiropractic Economics, Dynamic Chiropractic, In Practice Magazine, Chiropractic Products, The Chiropractic Journal, HealthKeepers, The Internist, Explore, and Healthy and Natural.

As part of his ongoing effort to educate about the benefits of homeopathy, Dr. King frequently speaks at professional meetings and continuing education seminars. He is always well received; audience surveys include comments that Dr. King's presentations are “practical,” “enlightening and to the point,” “innovative,” “entertaining,” and “just what I needed!”

Dr. King, his wife, Suzie, and their children live on their farm near Asheville, North Carolina. The Kings are committed to restoring the genetic diversity of the great American Bison, and host one of the largest bison herds in the southeastern United States. The entire King family practices and promotes healthy lifestyle and living to its fullest potential.
