

Are You Charged?

Just like your cells, the earth acts as a battery and is electrically charged.

Lightning is essential for keeping the earth's charge at a healthy level. If lightning didn't strike the earth, the atmosphere (which provides oxygen and protects us from radiation) would disappear.

DID YOU KNOW?

- Without lightning the earth's atmosphere would disappear in minutes
- Thousands of daily lightning strikes return negative charge to the earth, preserving the atmosphere
- Lightning turns nitrogen and other gases into organic fertilizer for plants
- Without electrical charges and signals, your organs and cells couldn't perform their essential functions

DID YOU KNOW?

Your body is a battery and requires electrical charge and energy to function. When your cells don't have enough energy...

- Your body becomes stressed, making you more vulnerable to illness and injury
- You may have chronic pain because your injuries can't repair fully
- You're often tired, or feeling rundown

ARE YOU RUNNING ON "E"?

Why Continue In **PAIN?**

Too much stress, poor diet, lack of sleep and exposure to harmful electromagnetic fields (EMF - like those from cell phone towers, WiFi and electrical appliances) cause problems in your body.

Your cells' energy or charges are depleted, so your body can feel rundown, has more pain and can't heal itself properly. We often learn to live with chronic pain and fatigue, and begin to think that's "NORMAL."

**But you don't have to live with pain, inflammation and fatigue anymore!
PEMF may be the answer.**

WHAT IS PEMF?

Pulsed electromagnetic field technology generates a pulsing magnetic field that many find beneficial for supporting the body's natural healing ability.

HOW DOES IT WORK?

Sends pulsing electromagnetic fields into the body, recharging your trillions of cells and giving your body the energy it needs to repair what ails you. Bringing your cells back to the charge they need gives you more energy, reduces pain and revitalizes your lifestyle.

PEMF is used to help your body regain its energy, it doesn't treat a specific condition. PEMF optimizes the body's natural self-healing and repair functions.

Health is our greatest possession. —Lao Tzu

Take yours back by trying PEMF today.
