REFRIGERATE FOR OPTIMUM ACTIVITY

Available in bottles of 25.1g (0.89 oz)

NO FILLERS/NON-ALLERGENIC

**A powdered alternative to capsules
supporting healthy intestinal balance***

Do you have patients who cannot or will not swallow capsules? This comprehensive blend of 4 Lactobacillus and 4 Bifidobacterium species has all the benefits of “friendly” naturally occurring bacteria vital to overall health in an easy to mix, no taste powder.* Beneficial bacteria often become imbalanced by poor diet choices, poor digestion, antibiotic use, surgery, and environmental lifestyle stressors. This formula encourages mucosal integrity, assists with regularity, and supports a healthy immune system.*

- **Probiotic Blend.** With over 40+ billion CFUs per serving, this GI tract stable blend has 8 strains of highly active and functional microorganisms. The prebiotic plant fiber Jerusalem Artichoke helps supply nourishment for “good” bacteria.* This formula is appropriate for adults and children unwilling or unable to swallow capsules. Also good for pets.
- **Powdered Product.** Easily dissolves with little to no taste. The powder can be mixed in water, juice, smoothies, or solid food at room temperature. It can also be mixed with a small amount of water, creating a paste that can be put on the tongue or gums. Or, dissolve in water and swallow or administer with a medicine syringe.
- **Safe and Effective.** Probiotics have been safely used to support optimal flora, provide relief from occasional GI discomfort, reduce problems associated with lactose intolerance, and encourage healthy and timely elimination by acting as a natural stool softener.*

Health Benefits: Transformation’s Professional Protocol Probiotic Plus™ is a powdered probiotic supplement designed to help support gastrointestinal system health.*
